1925-24

THE STATE CONFERENCE ON SOCIAL WORK.

Vincennes, October 3 to 6, 1925.

Plans for the State Conference at Vincennes are developing rapidly. President Milligan and Secretary Brown, who met with a group of citizens at Vincennes recently to discuss preliminary arrangements, report a lively and most gratifying interest on the part of those to whom the Conference will look for a successful carrying out of the local program. Consideration was given to meeting places for the various sessions, a room for the exhibit and hotel quarters for the delegates and visitors. A local committee, headed by Mr. W. H. Hill, president of the Knox County Board of Children's Guardians, has been appointed to look to look after all the details.

The Executive Committee of the Conference met in Indianapolis December 8, 1924, and again May 16, 1925. Senator C. O. Holmes, Gary, presided. October 3 to 6, 1925, was selected as the date for the Vincennes meeting, and the general topic of "The Conservation of our Heritage" was chosen. Dr. James W. Milligan, Senator Holmes and the Secretary, John A. Brown, were appointed a general committee on program, and the following chairmen of divisions were named:

State Charities.....	Mr. Claude Gregg, Vincennes
County Charities.....	Mr. James L. May, Richmond
Public Health.....	Mr. Robert E. Neff, Indianapolis
Family Welfare.....	Miss Lena Reading, Terre Haute
Child Welfare.....	Judge E. Miles Norton, Crown Point

A separate committee for each division, representing various institutions and agencies throughout the state, was selected and instructed to report to the respective chairmen. A meeting of the general committee and of division chairmen was held in Indianapolis July 11, 1925, to discuss details of the Vincennes program.

The general plan of preceding conferences will be followed rather closely. The meeting will open Saturday evening. There will be general sessions Sunday afternoon and evening and Monday evening. Visiting delegates will speak in the local churches Sunday morning. Monday and Tuesday mornings will be given over entirely to Round Tables. The affiliated state-wide associations will have luncheons Monday noon, followed by brief programs. From 3 to 5 on Monday afternoon will be devoted to seeing places of historic interest in the city of Vincennes. The annual Conference dinner Monday night and a luncheon Tuesday noon will bring the meeting to a close. Those who can remain over will have additional opportunity to see Vincennes Tuesday afternoon.

Some of the ablest speakers in the field of social work have accepted the invitation to take part in the Vincennes program. The list includes Mr. Charles H. Johnson, secretary of the New York State Board of Charities; Mr. Wilfred S. Reynolds, a former Hoosier, now Secretary of the Chicago Council of Social Agencies; Mr. Frank J. Bruno, secretary of the Family Welfare Society of Minneapolis; Dr. W. P. Dearing, president of the Indiana State Teachers' Association; Dr. W. A. Evans, editor of the Chicago Tribune health department, and Ernest P. Bicknell, former secretary of the Indiana Board of State Charities, now vice-president of the American Red Cross, Washington, D. C.

The complete program of the Conference will be printed in a special number of this Bulletin at an early date.

A special effort is to be made this year to secure a large and representative exhibit. Let every institution and agency engaged in social work in Indiana consider this an invitation to participate. Write the Conference secretary, John A. Brown, State House, Indianapolis, for any desired information.

President Milligan says: "At Vincennes, in the centuries past, men of vision and action accomplished great things, not only for Indiana, but for the Nation. It is fitting that the first meeting of the State Conference under its new name should be held in this historic spot. You are urged to attend, not only that you may lend the influence of your presence, but that under the inspiration of the mighty achievements of the past we all may return with finer ideals of Service."

PORK PRODUCTION AT COUNTY INFIRMARIES.

By Lynn Robertson

Department of Farm Management, Purdue Agricultural Extension Department.

County poor farms that are large enough to carry on a general farming program, as are most of the Indiana county farms, should usually keep at least enough sows to supply pork to the inmates and to the hired help. At nine county infirmaries where the farm business was recently studied there was an average of approximately 125 pounds of live hog butchered during the year for each person on the farm, the amount ranging from 75 pounds to 200 pounds. Judging from the amount consumed on some of the most efficiently-managed county farms and from various available figures indicating a pork consumption of approximately 165 pounds per adult on privately-owned farms in Indiana, it is safe to figure that the equivalent of approximately one 200 to 225 pound hog per person should usually be available for butchering on county farms.

On a few county farms a comparatively large amount of beef butchered lessens the pork requirements, but inasmuch as beef cattle do not ordinarily have an important place in the farming program on county farms, most of the beef available is usually in the form of veals or young animals from dairy stock. Hogs, therefore, must be depended upon as the chief source of home-grown meat. The greater ease of keeping pork as compared to beef is also a factor.

There is one big difference between the hog problem on county farms and on other farms. On county farms it is not necessary to adjust the hog program to hog price variations to any great extent, as most of the hogs are produced for butchering rather than for the market. For this reason the important problem is to bring the hogs to butchering size as cheaply as possible at any time during the cold winter weather rather than to get them ready for market early in the fall when the prices are usually much higher than in the winter. The most advantageous time for spring farrowing may often be later, therefore, on county farms than on general farms. Pigs farrowed late in April, in May or even later, can be kept growing rapidly on good pasture and then be fattened largely on new corn rather than on higher priced old corn and thus be brought to butchering size more cheaply.

If the pigs are raised chiefly from old sows it is difficult to take advantage of this fact, however, for the reason that when sows are kept thruout the entire year two litters per year are more economical than one, and late spring pigs result, of course, in late fall pigs. When fall litters are to be raised from the same sows it is better to have the spring litters farrowed early rather than to have these late fall pigs which are difficult to handle satisfactorily.

One satisfactory method of securing the later spring pigs without the disadvantage of the late fall pigs, however, is to raise most of the pigs from gilts rather than from old sows, and to sell or butcher these gilts as soon as they can be put in good condition after weaning their pigs, rather than carrying them over for further breeding. This eliminates the feeding of sows the entire year for one litter.

If the practice of raising pigs from gilts is followed it is preferable to keep one or more mature sows to produce the gilts for breeding rather than to save gilts from other gilts. These mature sows should farrow early in the spring and fall to produce gilts to be bred for late April or May pigs.

If fall pigs are raised for butchering one of two procedures is usually most satisfactory. If the fall pigs are farrowed as early as September they can be pushed rapidly enough so that they should be ready for butchering by the following March. If the fall pigs are farrowed later they must usually either be put on the market during the summer or else carried over for butchering early the following winter. On one successful county farm where about 35 pounds of lard per person are used each year, from eight to fifteen one-year-old hogs are butchered so that a large amount of lard will be available.

Since the primary purpose of hog raising on county farms is the production of pork to be consumed on the farm, the necessary amount of which is fairly constant from year to year, there is little reason for varying the number of brood sows in an attempt to outguess the market. The best program should be determined and then followed as systematically as possible from one year to another.

Selection of Breeding Stock.

A few of the general problems of all hog raisers that are of greatest importance for consideration on county farms are: (1) selection of breeding stock, (2) sanitation, and (3) feeding.

While there is perhaps less variation in the apparent quality of hogs in Indiana than of other classes of livestock, there is, nevertheless, a great difference between hogs not only in the quality of the fattened animals but also in their ability to grow and put on flesh economically, and to raise profitable litters. Therefore, type and quality of individuals and also probable breeding qualities should be considered in selecting gilts for breeding. Gilts should be saved as far as possible from sows that have a record of having farrowed and saved large, uniform litters. The number of pigs raised per litter largely determines the cost of each pig at weaning time. On a number of general farms in Tippecanoe County in 1922 it cost \$5.84 to bring a pig to weaning age in litters of five or less as compared to \$2.77 per pig when there were seven or more in the litter.

Sanitation Important.

Sanitation is also an important factor in determining the number of pigs per sow brought to weaning age and also the economy of gain before and after weaning. Recent hog cost studies indicate that this is an even more important problem than it has usually been considered. One of the important sanitary precautions is to have the sow with her young pigs on land that has not recently been used for hogs. On county farms, at least those with not over ten sows, it is probably well to have the sows farrow in individual houses on pasture rather than in centralized hog houses, from the standpoint of both sanitation and cost. In either case it is well to take the following sanitary precautions: (1) Clean the farrowing quarters thoroughly; (2) spray the cleaned surface carefully with a three per cent solution of liquor cresolis or a five per cent solution of coal tar disinfectant, preferably adding desiccated lime to the solution to aid in detecting unsprayed surfaces; (3) wash the sows with disinfectant solution before putting them in the disinfected quarters; (4) either have the farrowing quarters in a pasture field not recently used for hogs, or else move the sow and litter to such a pasture as soon as possible after farrowing.

If small lots are maintained for hogs, as they are on some farms, it is important that these lots be rotated in hog forage crops such as rape, rye, corn, soybeans, etc., rather than remaining as "dry" lots.

Economical Feeding.

There is much the same variation in feeding practices and in consequent gains from one county farm to another in Indiana as from one privately-owned farm to another. On some county farms good rations are used; on other county farms much better results would follow different feeding practices.

For mature sows on good pasture at breeding time corn or a mixture of about 60 parts of corn and 40 parts of oats is a good feed, but for gilts at breeding time, for bred sows and gilts, and for pigs during the growing and fattening period some supplementary feed richer in protein, such as tankage, skim milk, or soybeans, is economical. For bred sows and gilts any of the following rations are desirable: 1. Corn, 50 pounds; oats, 45 pounds; tankage, 5 pounds. 2. Corn, 60 pounds; wheat shorts, 35 pounds; tankage, 5 pounds. 3. Corn, 90 pounds; tankage, 10 pounds; alfalfa or clover hay. 4. Corn, 1 pound, skim milk, 1 pound; alfalfa or clover hay. During the two or three days immediately before farrowing it is well to reduce the amount of feed and substitute wheat bran or ground oats in place of a part of the corn. For 24 hours after farrowing nothing but water is advisable, after which the same ration given immediately before farrowing without the tankage or other supplement, is satisfactory. This is a period when there is danger of overfeeding. A double handful of feed twice daily in a thin slop is sufficient at first. When the pigs are a week old a handful of tankage or two to three quarts of skim-milk per sow may be added. The feed may be gradually increased until the pigs are ten days to two weeks old after which a liberal feed on good pasture is important.

When the pigs are three to four weeks old they should begin to be fed separately in a creep where the sows can not molest them. A good ration for this period is made up of four pounds of shelled corn, four pounds of wheat shorts, and one pound of tankage or ten pounds of skim milk.

For raising shoats after weaning some protein concentrate should supplement the corn. Good rations for spring-farrowed shoats on legume pasture are: 1. Corn or ground barley or a mixture of the two in any proportion, 95 pounds; tankage, 5 pounds. 2. Corn, 75 pounds; wheat middlings, 20 pounds; tankage, 5 pounds. For fall-farrowed shoats the lack of pasture makes it advisable to reduce the proportion of corn in the above rations about five pounds and increase the tankage five pounds.

In any hog ration if more skim milk is available on the county farms than can be utilized economically by the poultry it is advisable to substitute it in place of tankage at the rate of about ten pounds of skim milk to one of tankage.

If soybeans are included in the crop rotation, as they are on a number of county farms, they usually furnish a more economical source of protein than the tankage. One and one-half to two pounds of soybeans may be used in place of one pound of tankage but a mineral mixture of ten parts of wood ashes or finely pulverized limestone, ten parts of 16 per cent acid phosphate and one part of common salt should be available to the hogs in addition to the other feed.

Garbage may be utilized to advantage for hog feed altho the amount of garbage available is negligible on many county farms.

A good male, such as this one which heads the herd on one county farm, is important in maintaining a high quality of hogs.

Two of the purebred sows on a successful county farm in central Indiana. One of these sows was a first-prize winner in the state pig club contest at the State Fair.

Individual hog houses that may be moved to clean, fresh land at each farrowing are a help in saving pigs.

This butchering equipment has been found to be a great convenience on one county farm in Indiana.

LETTER OF TRANSMITTAL.

Room 404 State House,
Indianapolis, Indiana.

Hon. Ed Jackson,
Governor of Indiana.

Dear Sir:

In compliance with law, the Board of State Charities has the honor to submit herewith its thirty-fifth annual report, being for the fiscal year ending September 30, 1924.

Respectfully,

FRANCIS H. GAVISK,
WILLIAM J. SAYERS,
MORRIS M. FEUERLICHT,
MARY A. SPINK, M. D.,
MAUDE LUCAS RUMPLER,
WM. H. EICHHORN,
The Board of State Charities.

JOHN A. BROWN,
Secretary.

GENERAL REPORT OF THE BOARD.

The Board of State Charities, created by the Legislature of 1889, is composed of six members, appointed by the Governor for terms of three years each, and representing equally the two leading political parties. They serve without pay, but are allowed necessary traveling expenses.

The board's duties, as set forth in the Act of 1889, are:

1. To investigate the whole system of public charities and correctional institutions of the state;
2. To examine into the condition and management of prisons, jails, infirmaries, public hospitals and asylums;
3. To secure accurate, uniform and complete statistics;
4. To examine and offer suggestion and criticism on plans for new jails and poor asylums;
5. To report its findings to the Governor and to print an annual report for the use of the Legislature, with such suggestions as it deems necessary and pertinent.

The board is authorized to send for persons and papers and to administer oaths and affirmations. It appoints an executive officer, or secretary, who in turn appoints his employees. It meets in regular session every three months, and oftener as required. It makes such rules and regulations for its own proceedings as are necessary.

Additional Duties:

To the original duties of the board, which were those of investigation and general supervision of public charities and correction, the Legislature has added others from time to time, some of which are of an administrative character. Four distinct departments have been created:

1. *Outdoor Relief Supervision.* The poor relief law of 1895 and later revisions placed upon the board the supervision of outdoor poor relief. Under the operation of this law pauperism has been checked. In 1897, 82,000 persons received aid from the township trustees and poor relief amounted to almost two-thirds of a million dollars. From the studies of the Board of State Charities the law was recommended providing for business methods and supervision of poor relief. Immediately the cost fell. The average annual reduction of poor relief the 26 years before 1923, below what it was in 1897, has been almost one-third of a million dollars.

2. *State Agency for Dependent and Neglected Children.* In 1897, the board was made the agent of the state in the supervision of all orphans' homes and associations supported in whole or in part from public funds. The board adopted and has continued the policy of placing dependent children in free foster homes. It has encouraged

local institutions and agencies to do likewise. Every dependent and neglected child made a public ward costs the taxpayer 75 cents a day so long as it remains in an institution. That expense is saved for each child placed in a family home. Besides it is better for the child. Through the efforts of the board, with the co-operation of the local agencies, an average of 3,000 children is maintained in foster homes. If this group were maintained in institutions, it would cost \$3,000,000 for buildings and another million dollars for their maintenance. Every home in which such children are placed is properly investigated and the children are visited at least once a year and oftener as occasion demands. The board feels that they should be visited regularly twice a year to insure the best possible care.

3. *Licensing of Maternity Hospitals and Child-caring Agencies.* In 1909 the legislature placed upon the board the duty of licensing maternity hospitals and all child-caring institutions, homes and agencies. An investigation in Indianapolis and elsewhere in 1908 disclosed a notorious traffic in infants. Babies were sold, raffled off or left to die on somebody's doorstep. Their unfortunate mothers were cruelly exploited. That was all stopped by the act of 1909, requiring all child-caring agencies and maternity hospitals to obtain a license from the Board of State Charities. Those agencies are now inspected and licensed annually. There are at present 193 licensed agencies.

4. *Deportation of Non-Resident Dependents.* In 1917 the legislature passed a law providing for the deportation of non-resident insane, epileptic, feeble-minded and poor persons. The administration of the law was placed upon the Board of State Charities. Through the operation of this law non-residents are returned to the states where they have a legal settlement. The board has prevented the return to Indiana of persons without legal settlement in the state, accepting only those rightfully belonging to it. In the past seven years the board has dealt with 520 cases and adjusted each according to its merits, at a considerable saving to the state.

Still other duties of the board may be enumerated as follows:

5. A law passed in 1893 requires the secretary of the board to examine and sign the punishment record of the State Prison.

6. The appropriation act since 1899 has carried a provision for additional maintenance for certain of the state institutions if their population increases beyond a fixed number. The Board of State Charities certifies to the Auditor of State the average daily population of these institutions.

7. The board formulates rules for the government of county jails and poor asylums and under a law passed in 1899 co-operates with the several boards of county charities and correction in supervising such institutions.

8. A law was enacted in 1899 to regulate the importation of dependent children. Certain eastern states had been sending such children

to western states in carload lots, for placement in family homes. Many of these children were straightway forgotten by the agencies which placed them, and some became inmates of public institutions. The law of 1899 put a stop to this practice. It provided that agencies outside of Indiana placing children within the state shall first file with the Board of State Charities, and approved by it, a \$10,000 indemnity bond protecting the state against the dumping of undesirables upon it. This has saved us from much poor stock and has also saved us money. There are now five agencies authorized to place their wards in Indiana, all under supervision of the Board of State Charities and a heavy bond to remove the children should it be deemed desirable.

9. In the juvenile court act of 1903 provision was made for the board to visit all institutions, public or private, caring for dependent and neglected children and also to pass upon the fitness of associations proposing to incorporate for the purpose of caring for dependent, neglected and delinquent children. Through this act the standards of child care have been improved and the public has been protected from unscrupulous organizations.

10. The board under a law passed in 1909 is required to report to the circuit and criminal courts and to the Governor on the condition of county jails which in its judgment are unfit for use, looking to the removal of prisoners until the jails are put in proper condition.

11. Under the law of 1909 establishing the Indiana Hospital for Insane Criminals, transfers to that institution are reported to the Board of State Charities.

12. The law of 1911 authorizes the board to consent to the adoption of dependent and neglected children.

13. The county general hospital law of 1917 requires that the plans and specifications for new hospital buildings shall be approved by the Board of State Charities.

14. A law passed in 1919 authorizes the state hospitals for insane to receive voluntary patients, and under plans approved by the Board of State Charities, to establish clinics and a system of after-care for furloughed patients.

15. Under laws establishing certain state institutions—the Village for Epileptics, Indiana Girls' School, State Farm, Farm Colony for Feeble-Minded, Reformatory—plans for new buildings are submitted to the Board of State Charities for criticism and suggestion.

16. A law of 1921 requires the Board of State Charities to pass upon charitable organizations and associations operating employment agencies.

At the present time, the institutions and agencies subject in one way or another to supervision by the Board of State Charities or with which the board is required to co-operate are as follows:

- 20 state charitable and correctional institutions.
- 92 county poor asylums.
- 90 county jails.
 - 1 county asylum for the insane.
- 20 county general hospitals.
- 5 county tuberculosis hospitals.
- 77 maternity homes and general hospitals having maternity wards.
- 61 children's homes.
- 35 other child-caring or child-placing agencies.
- 1,016 township overseers of the poor.
- 3,000 (average number) dependent and neglected children which have been made public wards by juvenile courts and placed in family homes.
- 81 boards of county charities.
- 92 boards of children's guardians.

The general work of the board is carried on by the whole board or by committees of its members. Members of the board and their secretary visit and inspect the work of the twenty state institutions. Reports are made and copies are filed with the Governor. The county poor asylums and jails are inspected annually and the proper county officials advised, in writing, of conditions. Inquiries are made in regard to all complaints. Orphanages, hospitals and other local institutions are inspected by trained workers. Conferences are held with boards of county charities, boards of children's guardians and other local agencies.

At regular intervals the board receives reports of persons who are aided from public funds or who are admitted to or discharged from certain public charitable and correctional institutions. Such reports are received quarterly from 1,016 township overseers of the poor, each of the 92 county asylums and the Marion County Asylum for Incurable Insane; monthly, from 18 of the 20 state institutions, from 38 orphans' homes receiving public wards and from 92 sheriffs—in all, 1,257 officials and 6,212 reports. In addition to these, numerous statistical reports are received from state and county officials.

Since 1890 the board has maintained a general card registration of inmates of certain public institutions. It began with four state and ninety-two county institutions. From time to time others have been added. At present the inmates of 149 institutions are registered. There are 181,063 different names. Two sets of the cards are kept. One is arranged by institutions and from it the board collects most of its statistics of public wards. The other is arranged in such manner as to bring together all the persons of one name and to make possible a study of pauperism, mental defect and crime.

There is a special registration of dependent children under supervision and one of the admissions to certain licensed institutions.

Accurate and complete records are kept of all dependent children while under supervision. Reports are made by agents on every visit. These reports are in duplicate and a copy is mailed to the county agency responsible for the welfare of each child.

In addition to performing the duties prescribed by law, the Board of State Charities has exercised a wide influence in state and local charities, both public and private, by promoting the annual state conference of charities. Through this agency it has brought together large groups of interested people with the result of a better understanding of the state social problem and a more definite co-ordination of state and local groups.

The board has through its studies and surveys been able to point the way to better laws and methods. It has promoted much legislation for the improvement of social conditions. Many laws have been the direct result of the board's recommendations. Others have had its active support.

So far as statistics of public charities and correction are available they may be summarized as follows:

Inmates present September 30, 1924, in:	
State institutions	13,949
County poor asylums (August 31)	3,301
County jails	897
Children's homes (public wards only)	1,841
Total	19,988

New admissions during the year to:	
State institutions	9,113
County poor asylums	1,309
County jails	36,681
Dependent children	1,175

Outdoor relief (i. e., aided by township overseers of the poor) for the calendar year 1923:	
Number of families	11,417
Persons not in families	4,820
Total number of "cases"	16,237
Number of persons	51,256

The expense incurred was as follows:

State institutions:	
Maintenance	\$4,154,984 02
New buildings and permanent improve- ments	2,131,176 47
Total	\$6,286,160 49
County poor asylums:	
Maintenance	\$1,186,231 62
New buildings and permanent improve- ments	89,383 64
Total	1,275,615 26

County jails:

Maintenance and sheriffs' fees, including board of prisoners.....	\$374,619 11	
New buildings and grounds.....	68,841 35	
Total		443,460 46
Dependent children		676,162 62
Outdoor poor relief (1923).....		524,297 81
Grand total		\$9,205,696 64

The general work of the board is carried on under the direction of nine standing committees, as follows:

1. The Committee on Mental Hygiene.

The state maintains eight institutions for mental cases: five for the insane, two for feeble-minded and one for epileptics. These eight institutions had an average daily population of 7,815.56 during the fiscal year which ended September 30, 1924. They received 1,391 new inmates during the year. There were 7,914 inmates actually present on September 30, 1924; 356 others on furlough or temporarily absent, —total enrollment, 8,270.

The current expenses of the eight institutions for the fiscal year amounted to \$2,127,177.84, an average of \$272.17 per capita for the year, or 74½ cents per day. The year's expenditures for permanent improvements amounted to \$485,629.04, making a total of \$2,612,806.88 for this group. The items entering into the totals given here appear in detail in other pages of this report. Attention is directed especially to the statistical tables on new admissions and the total enrollment for a period of years. The striking thing about the figures is not that the number of mental cases under state care is steadily increasing, but that the number of such unfortunates who need care, but do not receive it, remains about the same. There is temporary relief as new buildings are opened from time to time, but the waiting list soon fills up, and the pressure for admission continues.

In 1922 the Indiana Committee on Mental Defectives estimated that the then population of the state institutions for mental cases constituted 79% of the insane, 25% of the epileptics and 7% of the feeble-minded in Indiana needing institutional care. In other words, there were in Indiana 1,400 insane, 1,200 epileptics and 20,900 feeble-minded persons who needed, but were not receiving institutional care. There has been considerable enlargement of the institutions since then and other buildings are in process of construction; but the estimate of two years ago approximates present conditions. The Board of State Charities endorses the program outlined by the committee and recommended to the legislature to meet the situation. Briefly, this contemplates:

Additional accommodations in state institutions, especially for feeble-minded.

Provision for putting into operation the excellent voluntary admission law passed in 1919.

Mental clinics (or dispensaries) at which any one who realizes he is on the verge of nervous or mental breakdown may receive expert advice and treatment.

Similar clinics for the use of the courts, schools and welfare agencies.

A special unit in connection with the Robert W. Long Hospital, at Indianapolis, for observation and treatment of incipient mental disease.

Mental and physical examination and special follow-up care for all school children whose mental development is not normal.

Special training for mentally deficient children in the public schools.

Provision for training teachers and instructing medical students in problems of mental defect and mental disease.

The Board has given much attention the past year to the state hospitals for the insane. The Governor, on February 14, 1924, appointed a committee to consider the capacity of the hospitals and suggest readjustments in the districts, with a view to bringing about a better equalization of the districts according to the existing bed capacity. It was apparent to the committee that no beds could be added to the present number without seriously crowding the hospitals, but certain readjustments were found possible, some new cottages were about ready for occupancy, and the committee therefore recommended the addition of 413 beds and a redistricting of the state, as follows:

CENTRAL—Benton, Boone, Carroll, Clinton, Fountain, Hamilton, Hancock, Hendricks, Howard, Jasper, Madison, Marion, Miami, Montgomery, Newton, Parke, Tippecanoe, Tipton, Vermillion, Wabash, Warren and White counties.

NORTHERN—Cass, Elkhart, Fulton, Kosciusko, Lake, Laporte, Marshall, Porter, Pulaski, Starke and St. Joseph counties.

EASTERN—Adams, Allen, Blackford, Dekalb, Delaware, Grant, Henry, Huntington, Jay, Lagrange, Noble, Randolph, Steuben, Union, Wayne, Wells and Whitley counties.

SOUTHERN—Dubois, Gibson, Greene, Knox, Perry, Pike, Posey, Spencer, Sullivan, Vanderburgh, Vigo and Warrick counties.

SOUTHEASTERN—Bartholomew, Brown, Clark, Clay, Crawford, Daviess, Dearborn, Decatur, Fayette, Floyd, Franklin, Harrison, Jackson, Jefferson, Jennings, Johnson, Lawrence, Martin, Monroe, Morgan, Ohio, Orange, Owen, Putnam, Ripley, Rush, Scott, Shelby, Switzerland and Washington counties.

The governor adopted the committee's recommendation and made provision for the purchase of the beds needed.

At the present time all the hospitals except the Northern are accepting applications rather promptly. There are fewer insane in the county institutions. The rapid increase of population in northwestern Indiana makes the situation at the Northern Hospital the most serious

in the state. The capacity at that hospital, now 1,157, should be increased to 1,500 at the earliest possible date.

The board is convinced that the quickest and least expensive method of providing more room for the insane is to be found in the extension of the farm colonies and the furloughing of certain improved patients under the supervision of trained social workers. The board believes it possible to double the number now on furlough if the necessary supervision can be provided. Records in this office show that the patients now in the hospitals have been there an average of 10.8 years each. Forty-three per cent of the patients have been there ten or more years, some having spent more than fifty years in the hospital. Assuming that a patient after two years of mental illness may be considered chronic, the present population could be divided into 21.5% acute and 78.5% chronic. Everything possible should be done to reduce the average length of hospital stay. It would be good business for the state so to equip the hospitals as to enable them to apply every known means of treatment and at the same time devote considerable time to scientific study and research. It is the absence of these features even more than the low salaries paid which makes a state hospital service unattractive to physicians, particularly young men and women just entering the profession. All the Indiana hospitals, to greater or less degree, are suffering from lack of help and frequent changes among employees. The superintendents fully appreciate the situation. They are hampered by lack of funds. The present appropriations for current expenses average about seventy-five cents per patient per day. It is impossible to give much more than custodial care for such a small sum. Under the circumstances much credit is due for special activities, such as the course of lectures for medical and law students and social workers, conducted by the Central Hospital, the venereal disease clinic of the Eastern, the out-patient and social service department of the Southeastern and the occupational therapy and farm colonies of the Eastern, Northern, and Southeastern.

During the past fiscal year the state, through the death of Dr. Geo. F. Edenharter on December 6, 1923, and the resignation of Dr. S. E. Smith, December 12, 1923, lost the services of two veteran superintendents. Dr. Smith had been superintendent of the Eastern Hospital since 1891; Dr. Edenharter of the Central Hospital since 1893. The state owes these two physicians a heavy debt of gratitude. In recognition of the high esteem in which he is held, the board of trustees appointed Dr. Smith superintendent-emeritus of Easthaven. He was succeeded by Dr. L. F. Ross. Dr. Max A. Bahr was appointed superintendent of the Central Hospital, to succeed Dr. Edenharter.

Within the year two cottages and a new dining room for women patients were opened at the Central Hospital. The hospital for the sick has been made a receiving hospital for new patients. The superintendent is making every effort to put the institution in good physical condition. It is unfortunate that the patients have little or no means of occupying their time. Most of them are idle except for occasional walks about the grounds.

The crowded condition of the Northern Hospital has been mentioned. Most of the single rooms have two beds. Great pressure for the admission of new patients is constantly brought to bear upon the superintendent. The management deserves high praise for the fine standard of administration maintained.

The Eastern and Southeastern are in good physical condition and the patients show good care. A large percentage of the patients are employed at tasks which are designed to be helpful to their mental condition.

The patients at the Southern Hospital receive good physical care and the grounds and buildings make a fine showing, but the hospital, operating as it does on an average per capita cost of forty-five cents a day, undertakes none of the modern methods of treatment. It has the smallest staff of physicians and attendants of any of the five hospitals. The patients who are able to work are kept busy at farm and domestic service, but there is no occupational therapy, and the receiving department, excellently equipped for intensive treatment of new patients, is not used for that purpose. The Board of State Charities would like to see the Southern Hospital brought up to the standard of its neighbor, the Southeastern, in these particulars, and all the hospitals encouraged to develop what has so far been attempted by some of them in a very limited way because of shortage of funds. One dollar a day per capita instead of the present average of seventy-five cents for current expenses would yield excellent returns. One expects to pay and does pay several dollars a day for the treatment of physical ailments. Why limit the treatment of mental sickness to seventy-five cents? Our state hospitals need to do more than they can possibly do now for the treatment of their mental patients, and the state should profit by the opportunity for research as well as education of the public in the nature and prevention of mental breakdown.

At the School for Feeble-minded Youth, at Ft. Wayne, the population has been increased by crowding in beds. The superintendent, Dr. Biggs, realizes that this over-crowding is not desirable, but feels it is better to crowd the institution than to leave patients uncared for in the community. We are much impressed by the progress of this institution. There are many improvements in buildings and grounds and in the care and training of the children. Especially commendable is the clinical work. It is necessarily limited, but what has been done indicates its importance and value. The traveling and out-patient clinics have helped develop public interest in the problem of mental defect. A good start has been made in paroling girls under the supervision of a social worker. All the inmates who are able to work are kept busy. There are in the institution about one hundred women past 45 years of age who might well be returned to their respective counties in order that an equal number of young women of child-bearing age might take their places and have the protection which they so greatly need. If it were possible to do it, the state should care for all of them. Since it is necessary to choose, the younger women should be given the preference. There are also at the school a number of boys for whom room should be made at the Farm

Colony at Butlerville. The Ft. Wayne institution should specialize on industrial training and transfer to Butlerville all boys who have received as much training as they can take.

The Farm Colony for Feeble-Minded, at Butlerville, which was opened 4½ years ago, is developing slowly. There are now 150 boys and men at the place. They appear clean, comfortably clothed and well fed, and are busy with the construction and farm work. A new building for 60 boys was occupied this year and another will soon be ready. Several new service buildings are in use. The legislature should provide funds for a more rapid development of this institution. The unrestrained feeble-minded boys of a community are a prolific source of anti-social conduct, and serious crimes are sometimes committed by them. There is serious need of increased provision for state care of this group.

A high standard of administration is maintained at the Village for Epileptics, at Newcastle, and there is evidence that the patients receive good care. Of the 398 patients, 49 are boys under 16 years of age. School is conducted for such as are capable of learning. There is much new construction. The buildings and grounds, farm and gardens look well. The new buildings for women are completed, but not furnished. Walks and roadways are being constructed. This has been a big task, due to the amount of grading that was necessary. The long waiting list and the needs throughout the state make it highly desirable that this department be opened at the earliest possible date, also that the entire institution be expanded to a capacity of at least 1,200.

2. Committee on Penal and Reformatory Institutions.

There are six state penal and correctional institutions, four for adults, two for juveniles. Of the four institutions for adults, the state prison and reformatory and the penal department of the Woman's prison are for felons; the state farm and the correctional department of the Woman's Prison are for misdemeanants. On September 30, 1924, the six institutions had 4,414 inmates actually present, 1,363 on parole, 391 on suspended sentence and 198 temporarily absent, a total enrollment of 6,366. During the year they received 4,952 new commitments, and had a daily average population of 4,111.84. This was an increase of 269.75 over the preceding year.

This group of institutions spent a total of \$2,472,769.30 during the fiscal year, which ended September 30, 1924. Of this sum, \$1,084,880.27 was for current or operating expenses, \$1,387,898.03 for new buildings and permanent improvements, chief among which was the construction work at the new reformatory at Pendleton. These institutions turned into the general fund the sum of \$245,183.11 as earnings and miscellaneous receipts. All earnings above this sum were credited to the industrial and farm rotary funds of the several institutions and are available as working capital for the coming year. Including the original appropriations there was a balance of \$445,538.28 in the rotary funds September 30, 1924.

A statistical table appearing in this report under the heading "The State Institutions" shows that 33,762 persons were committed to

these six institutions in the past ten years. Classified by institutions and by sex, these commitments were as follows:

	Males	Females	Total
State Prison, Michigan City.....	3,432		3,432
Reformatory, Pendleton (formerly Jeffersonville)	5,829		5,829
State Farm, Putnamville	18,147		18,147
Woman's Prison, Indianapolis		2,711	2,711
Boys' School, Plainfield	2,516		2,516
Girls' School, Clermont		1,127	1,127
Total	29,924	3,838	33,762

Another classification is as follows:

YEAR	Felons		Misdemeanants		Juvenile Delinquents		Total		
	Male	Female	Male	Female	Male	Female	Male	Female	Total
1915.....	1,081	15	1,174	471	204	113	2,459	599	3,058
1916.....	878	17	2,322	342	250	128	3,450	487	3,937
1917.....	845	24	2,536	434	290	129	3,671	587	4,258
1918.....	621	20	1,238	225	338	117	2,197	362	2,559
1919.....	733	26	1,176	124	290	118	2,199	268	2,467
1920.....	693	25	993	91	252	102	1,938	218	2,156
1921.....	1,166	23	1,662	121	241	95	3,069	239	3,308
1922.....	1,049	23	1,841	139	199	90	3,089	252	3,341
1923.....	891	22	2,202	279	206	126	3,299	427	3,726
1924.....	1,304	32	3,003	258	246	109	4,553	399	4,952
Total.....	9,261	227	18,147	2,484	2,516	1,127	29,924	3,838	33,762

This group may be classified again by age. The total of 33,762 includes 1,127 girls from 10 to 18 years of age and 2,711 women over 18; 2,516 boys from 10 to 16 years and 27,408 men over 16. This larger group of male adults is further classified by years as follows:

AGE OF PERSONS COMMITTED TO THE INDIANA REFORMATORY, STATE FARM AND STATE PRISON, 1915-1924.

YEAR	Reformatory		State Farm			State Prison	
	Under 21	21-30	Under 21	21-30	30 and over	Under 30	30 and over
1915.....	222	400	108	306	760	62	397
1916.....	199	312	181	671	1,470	36	331
1917.....	215	282	258	665	1,613	66	282
1918.....	134	197	146	356	736	185	105
1919.....	282	214	288	355	533	19	218
1920.....	243	244	250	391	346	25	181
1921.....	356	275	322	602	738	40	295
1922.....	304	402	297	589	955	29	314
1923.....	236	294	262	708	1,232	22	339
1924.....	334	484	503	1,078	1,422	41	445
Total....	2,525	3,304	2,621	5,721	9,805	525	2,907

AGE OF PERSONS COMMITTED TO THE INDIANA REFORMATORY, STATE FARM
AND STATE PRISON, 1915-1924.

YEAR	Under 21 years	21 to 30 years	30 years and over	Total
1915.....	339	768	1,157	2,255
1916.....	389	1,019	1,891	3,290
1917.....	473	1,013	1,895	3,381
1918.....	289	738	841	1,859
1919.....	570	588	751	1,909
1920.....	499	660	527	1,686
1921.....	678	1,117	1,033	2,828
1922.....	601	1,020	1,269	2,890
1923.....	498	1,024	1,571	3,093
1924.....	837	1,603	1,867	4,307
Total.....	5,146	9,550	12,712	27,408

On other pages of this report appear statistics showing the operation of the parole law and the suspended sentence law. The indeterminate sentence and parole law is beyond question one of the most potent influences for good entering into the management of the state prisons and the reformatory. If any criticism is to be made, it should be directed against the limitations placed upon the field work through shortage of funds. Closer supervision would mean fewer parole violations.

The Board of State Charities strongly recommends the extension of the indeterminate sentence law to misdemeanants committed to the State Farm and to the Correctional Department of the Woman's Prison. There is much recidivism among this class of offenders which might be overcome under a different system.

The board repeats its recommendation that the prison labor law of 1917 be put in operation. That law provides for a board of classification, composed of representatives of the prison, reformatory and state farm, to determine the industries and fix prices. The law contemplates the production of such articles as are needed by the state and its institutions and political divisions. In this connection the board desires to go on record as being opposed to the shirt-making industry for men. The training they receive in it is of little use after they leave prison.

The state prison at Michigan City has been put to a severe test the past year in having to care for a population far beyond its capacity. The daily average population was 313 greater than in 1923. Various things account for the increase. The number of court commitments was 125 more than in 1923. There is a steadily increasing number of insane criminals and of prisoners having long minimum terms. There is some increase in the number of life sentences,—136 in the past five years (1920-24) as against 119 in the preceding five years (1915-19). In proportion to population there were fewer paroles in 1924 than in some previous years. Principally, however, the increase was due to the presence of reformatory men who were transferred to Michigan City following the closing of the old reformatory at Jeffersonville. Four hundred twenty-eight were so transferred in 1923.

The excellent condition of the institution, the good health of the men, and the discipline maintained under the conditions existing, all tes-

tify to a high standard of administration. Warden Fogarty, his board of trustees, and his staff, deserve special credit for the work of the past year.

Employment is found for all prisoners. The binder twine factory, owing to difficulty in obtaining sisal from Mexico, has not been operated this year. The warehouse in which more than two million pounds of twine were stored, was partially destroyed by fire January 2, 1924. The fire was attributed to spontaneous combustion. A small amount of the twine was salvaged. A new wing, 120 by 40 feet, has been added to the Hospital for Insane Criminals. It has room for 60 patients. The work was done by the patients and other prisoners, at the low cost of \$18,000. It is a credit to the management.

By formal proclamation of the Governor, the new Reformatory at Pendleton was declared open November 19, 1923.

Geo. A. H. Shideler, superintendent of the reformatory since August 1, 1918, died December 10, 1923. In his death the state lost a faithful, conscientious official. On December 17, the board of trustees appointed A. F. Miles, assistant superintendent, to succeed Mr. Shideler. Solomon A. Vial, one of the reformatory parole agents, was appointed assistant superintendent. Both of these men have had long experience in dealing with delinquents. They have an exceedingly difficult task before them. With new construction going on, the ordinary problems of prison management are greatly multiplied. The population of 606 at the beginning of the fiscal year had increased to 1,096 at its close. There were 818 new commitments during the twelve months. Many of the prisoners are sleeping in temporary dormitories, on cots, some of which are double-deck. Most of the prisoners are employed. Recreation facilities are limited. It will require a high standard of morale to prevent dissatisfaction, if not serious outbreaks. It is greatly to the credit of the management that such a standard has been maintained. So far as can be observed, the general spirit seems good, though there is a disturbing element in the increasing number of men with long minimum sentences. The general health is good.

All contracts for new construction were canceled by the state, and the work is now being done by prisoners under the direction of skilled foremen. It compares favorably with that done by employed labor, and while slow, it was far below it in cost and provided occupation and excellent training for the prisoners.

The state farm at Putnamville received 3,003 new commitments the past fiscal year. This is the highest number in the history of the institution. The records show that 52% of the commitments were men under thirty years of age. Twelve men past 70 were received. Every county except Tipton was represented. Fifty-seven different offenses were listed, the most frequent being "unlawful possession of liquor", 1,078; "vagrancy", 487; and "petit larceny", 423. These three offenses were back of two-thirds of the commitments.

The institution besides its regular industries in the stone and brick plants, the willow shop and the farm, has had a considerable amount of new construction the past year. New brick buildings have gradually replaced all but one of the original temporary frame structures, the work

from the beginning having been done by the prisoners under employed foremen. The management estimates that the net cost of the institution to the state, for the fiscal year, was \$28,446.14. Due allowance is made for the increase in inventory.

A serious fire on June 28, 1924, completely destroyed the industrial building and its contents. This building housed the bathing facilities, clothing and sewing room, laundry and canning factory.

One is favorably impressed by the work of this institution, the constant effort to improve conditions and the results achieved.

The Woman's Prison is in good condition and well managed. Cleanliness and order prevail. The prisoners receive good care and proper medical attention. School is provided for the illiterates, and religious services are held every Sunday. All the women are employed at useful labor. A shocking thing occurred the night of February 25, 1924, when Gladys Ellis, a young woman prisoner, attacked and killed Miss Louisa Richards, an officer, took her keys and escaped. She was tried in the Marion County Criminal Court and acquitted as being mentally unbalanced. She was returned to the prison to serve the unexpired term of the sentence on which she was originally committed. No blame attached to the management for the unfortunate occurrence. The Board of State Charities, after a thorough investigation, made the following recommendations:

"We recommend as we have done before that a woman night watch be employed who should make frequent rounds of the floors where prisoners are confined. The solitary confinement cell should be strengthened. We believe the retention of all the keys by officers at night is unsafe and suggest that they be required to turn in keys to outside doors at night. The officer on night duty should have such keys in case of emergency. We believe it would be well to supply each officer with a shrill whistle for purpose of sounding an alarm or calling another officer in case of necessity. We understand the superintendent has already ordered such whistles."

The two schools for juvenile delinquents have had a good year and are in very satisfactory condition. There was an increase in commitments,—355 to the two institutions as against 332 in 1923 and 289 in 1922, yet the number was slightly below the average for the past ten years, which was 364. The health at both institutions is excellent. There were two deaths at the boys' school. One occurred suddenly in the swimming pool on July 10, 1924. The coroner rendered a verdict of accidental drowning and attached no blame to the management. New construction at Plainfield this year includes a residence for the superintendent, an addition to the dairy barn and a summer camp on the creek about a mile away. The camp is built of small logs and old materials salvaged from the institution, with room for 50 boys and two officers. The boys strive for the outing it provides, and it is therefore an incentive to good conduct. Much of the new construction is being done by the boys themselves and is a credit to their training.

The school work and vocational training conducted by both institutions is of a good standard, and the boys and girls who are on parole are carefully supervised.

The annual meeting of the State Probation Officers' Association was held at the girls' school July 16, 1924, and a number of judges and officers took advantage of the opportunity to visit the institution and observe its methods.

3. Committee on Educational and Benevolent Institutions and Hospitals.

This committee devotes special attention to the two state schools for the blind and deaf, the two state hospitals for the sick, the State Soldiers' Home and the Soldiers' and Sailors' Orphans' Home.

There has been little change in the population of these institutions for the past year. The average attendance was 328 at the state school for the deaf, 122 at the school for the blind, and these figures have been practically the same for the past quarter of a century. Both schools are well organized, the children happy and well cared for. They are apparently being well trained. The commission charged with the selection of a new site for the school for the blind has given much time to its duties, but has not yet reached a decision. The new building of the Board of Industrial Aid for the Blind at 536 West Thirtieth St., Indianapolis, was opened March 7, 1924. It is a substantial structure, well adapted to its purpose. A helpful work for the adult blind throughout the state is carried on.

The State Sanatorium at Rockville has had a good year. A new building for children is now in use. It is on the whole well planned and well constructed. This institution, like most of the others, suffers from frequent changes among employes. The Robert W. Long Hospital of Indiana University, in Indianapolis, is performing a fine service, not only in the medical care and treatment given the patients, but in the training of nurses and social workers. It is located close to the College of Medicine, the students of which receive valuable instruction through Long Hospital. The applications for admission to the hospital are far beyond its capacity. During the fiscal year which ended Sept. 30, 1924, there were 2,154 patients received, the highest number in the history of the institution. The average daily attendance was 120. The new Riley Memorial Hospital for Children is about ready for occupancy. (It was formally opened November 19, 1924.)

The Soldiers' Home, at Lafayette, had an average population of 560 during the fiscal year—399 being women. There were 78 deaths during the year. The aged Civil War representatives still constitute a majority of the members, but younger men and women of the Spanish-American and World Wars are coming in sufficient numbers to keep the population close to the average of several years back. The invalids receive good medical care. One wing of the hospital is devoted to the care of the mental cases. Occupational therapy has been introduced and a teacher is employed to teach simple hand work in basketry, weaving, sewing, etc. It is most commendable. The general spirit of the place is good. The members express satisfaction with the care received. The condition of the property is generally satisfactory.

The Soldiers' and Sailors' Orphans' Home, at Knightstown, closed the year with 299 children present. Many of the new admissions this

year were small children under school age. On the occasion of a recent visit there were twenty-three babies in the nursery. Two-thirds of the children are ten or more years old, nearly one hundred are over fourteen, and many have lived in the institution since babyhood. We would be derelict in our duty did we not protest against this condition—not because of the expense to the taxpayer though at an average of \$1.39 per day per child, that amounts to a considerable sum; but because of its unfairness to the children themselves. No child can be brought up in the unnatural atmosphere of an institution, no matter how well the institution may be conducted, without suffering for it. All the best authorities on child-care are agreed that normal children should be in normal homes, with foster parents, if their own parents are unable to give proper parental care and guardianship. The Board of State Charities strongly recommends for the children of soldiers and sailors those methods of care and treatment which experts agree are best for the development of any child into responsible citizenship. Only thus will the state fully pay its debt to those who fight its battles.

The management of the Home provides good care for the children, all of whom appear well and happy. The organization and physical condition of the institution show some improvement under the management of the new superintendent, Mr. L. A. Cortner.

4. The Committee on County, Township and City Institutions and Agencies.

The county, township and city institutions and agencies are usually spoken of as the local charities. Only such as are supported in whole or in part from public funds come within the purview of the committee named above.

There is a juvenile court in every county, the judge of the circuit court acting as juvenile judge in all except Marion county, which has a special juvenile court, and Vanderburgh county, in which the probate judge acts as juvenile judge.

The circuit judge appoints the board of county charities, which visits and inspects any institution supported wholly or partially by the county. The juvenile judge appoints the board of children's guardians for the supervision of dependent and neglected children. He appoints also the probation officer to assist the court in all cases having to do with incorrigible or delinquent children. All probation work is under the supervision of a state probation officer.

The county council appropriates the funds for various purposes and the board of county commissioners supervises their expenditure. The county institutions are the poor asylum, jail and hospital (general and tuberculosis). A number of counties maintain an orphans' home, but most of them subsidize a private institution for the care of their minor wards. The counties also may donate funds to a private institution or voluntary agency engaged in benevolent or public health work.

In towns and cities there are lockups and police stations. Indianapolis and Linton maintain city hospitals.

In townships the township trustee has oversight of the poor and needy and is ex-officio overseer of the poor.

At this time there are 92 boards of children's guardians, 81 boards of county charities, 92 poor asylums and one county asylum for the insane, 90 county jails, 23 orphans' homes owned by counties and 15 others which are caring for public wards, 20 county general hospitals and 5 county tuberculosis hospitals, approximately 250 lockups and police stations, 2 city hospitals, 1,016 township overseers of the poor. Fifty-eight counties have one or more juvenile probation officers. Excellent work is being done in many counties by public health nurses under the auspices of the public schools, the local board of health or a voluntary agency.

Every general hospital in the state and all the poor asylums, jails and orphans' home have been inspected at least once during the past year by a representative of the Board of State Charities. Special written reports on jails and poor asylums have been mailed to the board of county commissioners concerned, and a copy of the report on jails has been sent to circuit and criminal courts. Because of the heavy expense involved, we have not printed these reports in recent years.

The poor asylums may be classified into four groups; those modern in plan and construction; those remodeled and improved; those which have been built a long time and are poorly planned but with good administration, and those with buildings and equipment so poor and inadequate that they should be abandoned and modern buildings erected. Most of the institutions come within the first three classes and the inmates are reasonably well cared for.

The buildings in Crawford, Daviess, Martin, Ripley, Switzerland and Warrick counties are in such unsatisfactory condition that they are a disgrace to the respective counties and the state. They are old, decaying, dilapidated, fire trap structures, lacking in institutional requirements and having little of the essentials to simple comforts for inmates. These conditions have been frequently called to the attention of the county officials of each county, who have failed to act. The public conscience needs to be aroused to the point where it will demand the removal of the blot from their communities. Poor buildings are to be found also in Harrison, Starke and Brown counties. They are of frame construction and are fire traps. A number of the older buildings are poorly planned and equipped. Tipton county has obtained plans for a new asylum building.

In general the administration of the poor asylum is good. Some institutions are without sufficient help and supervision is not adequate. This is especially true in poor asylums where the superintendent's quarters are separate from inmates' quarters. In a number of buildings the domestic quarters are in the basements. Such arrangement is poor from the standpoint both of sanitation and of supervision and comfort of the inmates. We are glad to report the appointment of a new superintendent in Porter county, where a serious condition had developed through lax administration.

With the exception of Delaware, Lake, Lagrange, Madison and St. Joseph county poor asylums, facilities for the care of the sick are inadequate or lacking altogether. Provision for the care of the custodial

cases is needed in a number of counties. All the larger asylums should provide proper hospital and custodial facilities with nursing service.

In a few counties the superintendent is employed on contracts contrary to law. He receives a lump sum and is required to furnish equipment or pay help. This practice may lead to abuse and should be discontinued.

In counties where officials visit the institutions frequently and take an intelligent interest the best conditions prevail. The superintendents and matrons have a difficult service to perform and they need the cooperation of the officials and the public.

The county jail has in the past few years served its real purpose, the confinement of prisoners awaiting trial. With the establishment of the two state institutions for misdemeanants and the commitment to them, instead of to county jails, of prisoners with a sentence of more than 30 days or a sentence and fine and costs requiring imprisonment for more than 30 days, the jail population has greatly diminished.

Many of the jails are modern or sufficiently well planned to serve the community's needs if there is good administration on the part of the sheriff. A number of jails are of the penitentiary type and the light and ventilation are generally poor and unsatisfactory. Among these are Allen, Benton, Carroll, Floyd, Fountain, Jefferson, Posey, Tippecanoe and Whitley counties. The Montgomery county jail is of a circular type, the only one of its kind in the state. It is unsatisfactory and should be remodeled. In addition to these, serious defects in construction, sanitation and equipment are found in the jails of Blackford, Boone, Clark, Clinton, Crawford, Decatur, Delaware, Gibson, Hamilton, Howard, Jennings, Madison, Martin, Monroe, Ohio, Orange, Porter, Putnam, Spencer, Starke, Switzerland and Warrick counties. Of these two groups some buildings need complete remodeling and others should be abandoned and modern buildings constructed. There have been frequent jail escapes due generally to two causes. Some buildings are neither strong nor safe. Locking devices are broken and windows are not properly protected. In other instances supervision is lax. Prisoners are given the freedom of the entire jail instead of being confined within their proper quarters.

In a few instances we have learned of the practice of the kangaroo courts. The practice is to be condemned. It reveals only the weakness of the sheriff and his officers to govern the prisoners. Its practice works an injustice and hardship upon the inexperienced prisoner by which the experienced prisoner profits. A few simple rules adopted by the court, printed, posted in the jail and properly enforced by the officers will result in satisfactory administration.

A number of the thirty-eight orphans' homes receiving wards from the juvenile courts should be closed. It would be better for the children and less expensive for the counties if these minor public wards could be sent to a central state institution, there to receive such treatment and training as might be found necessary, looking to speedy placement in family homes. The small local institution is not properly equipped for this work. Some of these homes are private institutions, subsidized by

the counties at the rate of not to exceed seventy-five cents per day for each child. Others are owned and managed by the county. It is within the power of the court to make dependent and neglected children the wards of the court itself, the board of county commissioners or the board of children's guardians. There is an increasing tendency among the counties to make the board of guardians the sole agency for this work.

The boards of county charities, 81 in number, and the boards of children's guardians, of which there are 92, deserve great credit for their service to the unfortunates of their communities. Both boards are appointed by the circuit and juvenile courts of the respective counties and they serve as assistants to those courts. It is the duty of the board of county charities to visit and inspect the institutions supported by the county and report their observations and recommendations to the county commissioners and the Board of State Charities. They make an annual report to the circuit court. The board of children's guardians is the official child welfare board of the county. It exercises supervision over dependent and neglected children which the juvenile court assigns to its guardianship, and it may place such children in an institution or in a foster home, or may board them with their own mothers, paying the mothers not to exceed seventy-five cents per day for their care. There are at present some 1,300 children with their mothers under this arrangement. The boards have very broad powers under this law and are expected to maintain the most careful watch-care over their wards until twenty-one years of age, unless sooner released for sufficient reason.

A report on the outdoor relief situation in Indiana appears elsewhere in this report, with a statistical table giving the facts as to the number aided and the amount of relief during the past thirty years. A representative of the Board of State Charities has spent considerable time in the field the past year, consulting with township overseers of the poor, county officials and various voluntary social welfare agencies, all with a view to bringing about better understanding and enforcement of the law. The poor and needy who are not in institutions are the special charge of the township overseers of the poor (1,016 in number), acting as agents of the respective boards of county commissioners. Each overseer is required by law to keep a record (in specified form) of all relief given by him, and at least once each quarter to send two copies of the record to the county auditor, one for the board of county commissioners, one for the Board of State Charities. From these reports for the calendar year 1923 it was learned that 51,256 persons, representing 16,237 "cases", were aided by the overseers of the poor, to the extent of \$524,297.81.

5. Committee on Children.

This committee is charged with the administration of the law of 1897 creating the state agency for dependent children. It has power to act in the appointment and discharge of agents. The report of the state agent, in another part of this volume, gives the details of the year's work, not only of the agency, but of the child-caring institutions and boards with which it is intimately associated.

It is the duty of the state agency to keep closely in touch with the work throughout the state for dependent and neglected children which have been made public wards by the several juvenile courts. The institutions which care for these children make monthly reports of all received and released, and these reports form the basis of a central registration of all public minor wards of this class. The agents at intervals visit the institutions and the children placed by them. They also place children in foster homes, the law stipulating that any child being supported at public expense in any of these institutions is subject to placement by the state agents.

The state and county work for dependent and neglected children goes on steadily and quietly, without many persons realizing its magnitude or importance. Yet what is being done affects vitally the welfare of more than five thousand children whose usefulness as future citizens depends largely on the care given them in their youth.

There are 38 institutions in the state which receive and care for children made public wards by the juvenile courts. They have 1,841 inmates. Most of the children are the victims of parental neglect. They have been made public wards because the courts found the parents unfit to be trusted with the upbringing of their own children. They are of all ages, from infants to 16 years.

For good homes threatened by poverty provision can be made under the board of children's guardians law to help hold the families together. About 1,300 children are being cared for by their own mothers under this law.

The largest group of this class of public wards is made up of the children in foster homes. There are 2,715 of them. It rarely happens that a family takes more than one child into its home, so it may be said to their great credit, that 2,700 Indiana families have opened their doors to these homeless, or worse than homeless, wards of the state and are giving them the advantages of normal home life. Were it not for these foster homes, these 2,700 children would have to be cared for at public expense, which at the legal allowance of 75c, would mean \$2,000 a day. All of them are under state supervision and are visited at least once a year by agents of the Board of State Charities. It is found that 76% of these children "make good" in mature life.

Dependent and neglected children are becoming public wards in Indiana at the rate of nearly one hundred a month. The whole number of new wards reported last year was 1,175. This is the largest number in the history of the work. The average for the past ten years was 959 per year. These breakdowns in family life which are due not to death or poverty, but to parental neglect, are cause for serious thought.

It falls to the committee on children, also, to pass upon the application of organizations from other states for authority to place their wards in Indiana foster homes, under the law regulating the importation of dependent children, passed in 1899. At the present time, the five agencies named below are acting in Indiana, having filed the necessary bond:

The Children's Home, 312 W. Ninth Street, Cincinnati, Ohio.

The Chicago Industrial Home for Children, 1132 Washington Boulevard, Chicago. (Buildings and farm at Woodstock.)

The Catholic Home Bureau for Dependent Children, 289 Fourth Avenue, New York City.

The New York Foundling Hospital, 175 East Sixty-eighth Street, New York City.

The Cincinnati, Ohio, Bureau of Catholic Charities.

6. The Committee on Licenses.

A law passed in 1909 makes it a misdemeanor for any person, firm, corporation or association to maintain a maternity hospital or a children's home or to place children in family homes without first being licensed by the Board of State Charities. The law has now been in operation fifteen years and from the first has proven its value. It has weeded out many agencies of a disreputable character, raised the standard of others, and through timely advice prevented the organization of some that were contemplated. The law is a protection to the institution or agency which is properly conducted. As indicated in the report of the inspector there are now 192 licenses in effect.

7. The Committee on Publications.

The board has limited its publications this year to the annual report, the quarterly bulletin and a special bulletin which, by permission of the National Committee for Mental Hygiene, reprinted a series of articles on "Habit-Training for Children." In the interest of economy, a considerable amount of material has been eliminated from the quarterly bulletin that really should be printed. It is gratifying to the board that there is a constant demand for copies of its publications, from officials and from students of charities and correction.

8. Committee on Auditing.

A financial statement, covering the disbursements from each of the five funds appropriated for the work of the board for the fiscal year ending September 30, 1924, will be found at the close of this report. The total disbursements may be classified as follows:

Salaries and wages	\$29,565.54
Traveling expenses of members, employes and deported non-residents	14,589.49
Drayage and express	7.30
Telephone, telegraph and postage.....	1,345.67
Miscellaneous	71.00
Stationery, printing and office supplies.....	1,482.62
Office equipment	195.87
Total	\$47,257.49
An unused balance of \$2,842.51 reverted to the general fund.	

In addition to the above, there is available a revolving fund of \$1,000, appropriated by the legislature for the traveling expenses of de-

pendent children transferred to family homes. Such expenses during the year amounted to \$1,540.65. The bills rendered and the amount received from each county appear in the financial statement at the close of this report.

9. The Committee on Institution Plans.

Under the laws passed from time to time, it is required that plans for county poor asylums, county jails, county general hospitals, the Indiana State Farm, the Village for Epileptics, the Indiana Girls' School, the Indiana Reformatory, and the Indiana Farm Colony shall be submitted to the Board of State Charities for criticism and advice before final adoption. During the past year the committee has examined plans as follows:

Indiana State Farm—Recreation building, filtration plant and dormitory.

Farm Colony for Feeble-Minded—A colony building.

Tipton County—New county poor asylum.

Knox County—Alterations to an old frame residence purchased by the commissioners for use as a poor asylum. (Not approved.)

Preliminary drawings for a woman's building at the Wayne County

Poor Asylum and for a hospital and other improvements at the Elkhart County Asylum were examined.

The advice of this board is often sought by organizations and institutions not required by law to submit their plans. During the past year the committee or its secretary examined plans for the Marion County Home for Dependent Colored Children, for a superintendent's residence and building for employes of the St. Joseph County Tuberculosis Hospital, for a recreation building at the State Sanatorium at Rockville, for remodeling the Vanderburgh County homes for white and colored children, the Allen County children's home and the I. O. O. F. Home (Greensburg) dining room and kitchen.

NEEDED LEGISLATION.

The Board of State Charities, as a result of its study of the whole system of public charities and correction in Indiana, respectfully recommends the enactment of laws as follows:

A. For the Insane:

1. The establishment of a state psychopathic hospital, preferably in connection with the Robert W. Long State Hospital.
2. Adequate appropriations for state hospitals for insane:
 - a. To increase their capacity by means of farm colonies, in order to insure prompt admission of all persons adjudged insane and avoid the necessity of placing the mentally sick in jails or other unsuitable local institutions.
 - b. To establish clinics and out-patient clinics.
 - c. To establish reception departments for observation and intensive medicinal treatment.
 - d. To employ trained social workers to aid in furloughing patients.

B. For the Feeble-minded:

1. Provision for further control and training of the feeble-minded:
 - a. Through the extension and development of clinics and the establishment of wage-earners' colonies by the School for Feeble-Minded Youth.
 - b. Through the construction of additional buildings at the Farm Colony at Butlerville.
 - c. Through employment of social workers to place and supervise furloughed patients.
2. A law providing for mental as well as physical examination of all school children.

C. For the Epileptic:

Increased facilities for the care of the epileptic:

- a. Through the construction of additional buildings at the Village for Epileptics.
- b. Through authority given the institution to admit voluntary patients.
- c. Through establishment of clinics and out-patient clinics.
- d. Through employment of trained social workers.

D. For the Government of State Charitable and Correctional Institutions:

1. That the present laws relating to the number of trustees for the Soldiers' Home and the Soldiers' and Sailors' Orphans' Home be amended to make them conform with the uniform institution law of 1907, which provides for a bi-partisan board of four members.

2. That the appointment to any position in a state institution of a relative of any member of the board of trustees be prohibited.
3. That a member of the board of trustees of any state institution be declared ineligible for appointment to any position in that institution during the term for which he is appointed or for one year thereafter.
4. That the educational work of all state institutions be placed under the supervision of the State Superintendent of Public Instruction.
5. That appropriations be made for the traveling expenses of judges of the circuit and criminal court to enable them to visit at regular intervals each of the institutions to which they commit persons.
6. That an appropriation be made to establish a state receiving home for dependent children, which home was authorized by the legislature of 1913.
7. That a law be passed providing for unpaid boards of trustees for state institutions.

E. For County Institutions and Charities:

1. A law to place county poor asylums and county asylums for insane under the management of an unpaid bi-partisan board in each county, and to improve the standards of care for the aged and infirm.
2. A law abolishing the fee system for the board of county jail inmates.
3. A law authorizing overseers of the poor of the populous townships to employ trained and qualified assistants to aid in relieving and supervising the poor.

1924								

THE STATE INSTITUTIONS.

The State of Indiana owns and operates twenty benevolent and correctional institutions. Eight of these are for the care and treatment of mental cases, as follows: five for the insane, two for the feeble-minded and one for the epileptic. There is a state school for the deaf and another for the blind. There are two homes for soldier dependents, a general hospital, a sanatorium for the tuberculous, and six penal and correctional institutions, four for adults and two for juveniles.

These twenty institutions have 13,344.29 acres of land, of which 6,952.69 acres is cultivated in farm and garden crops, and 480.07 is in orchard. The remaining 5,911.53 acres is in lawns, timber, etc. The various farms are stocked with 556 milk cows and 591 other cattle; 423 horses and mules, 779 sheep, and 3,678 swine. There are different kinds of poultry—principally chickens, to the number of 14,722.

The land, buildings, equipment and supplies are valued at \$23,542,320.77.

The combined capacity of the institutions is 14,664. On September 30, 1924, they had 13,949 inmates actually present, and 2,469 others outside under supervision, a total enrollment of 16,418.

Of the 13,949 persons actually present, 57% were mental cases (insane, feeble-minded and epileptic); 32% were in the prisons and reformatory institutions; the remaining 11% were in the hospitals, schools for deaf and blind, and homes for soldier dependents. One person in every 210 of the general population of the state is an inmate of a state institution.

It will be found interesting to study the two tables which distribute the number present and the year's new admissions according to counties. On Sept. 30, 1924, seven counties—Howard, Madison, Marion, Montgomery, St. Joseph, Tippecanoe and Vigo—were represented in every one of the twenty state institutions.

During the year, 9,113 new inmates were received. This meant an average of nearly 25 a day. For the preceding year the new admissions totaled 7,269, an average of 20 a day. Of the whole number of new inmates in 1924, 6,320 were committed by the courts, 2,793 were received on applications.

The average population of the twenty institutions throughout the year was 13,481.9. The number of officers and employes averaged 2,119.93, which equaled one person on the payroll to every 6.3 inmates.

One of the tables which follows gives the number of new inmates received during each of the past ten years. During the decade, there were 70,803 new admissions, an average of 7,080 annually, or a little over 19 daily.

EXPENDITURES.

The institution expenditures appear under three heads: (1) current expenses, or maintenance; (2) land and permanent improvements; (3) rotary funds. The figures given here are summarized from the quarterly reports of the institutions to the Board of State Charities. They are printed in more detail in the Indiana Bulletin of Charities and Correction.

1. *Current Expenses.* For the fiscal year ending Sept. 30, 1924, current expenses amounted to \$4,154,934.02, an average of \$308.19 per inmate and an average of 84.4 cents per inmate per day. For the preceding year the average per capita cost was \$323.06 or 88.5 cents per day.

2. *Land and Permanent Improvements.* The state paid out \$2,131,176.47 for permanent improvements at the state institutions during the year. A little over half of the total (\$1,261,141.78, to be exact) was used by the new reformatory, at Pendleton. The principal items entering into the balance were \$195,362.37 for the new service plant at the Soldiers' Home, \$140,185.42 for the Eastern Hospital's power house, \$97,926.22 on the group of buildings for women patients at the Village for Epileptics, and \$80,072.94 on buildings and equipment at the Farm Colony for Feeble-Minded.

3. *Rotary Funds.* Under this head come the rotary funds of the State School for Deaf, State Prison, Reformatory, State Farm and Boys' School. A tabulated statement follows, showing the condition of each fund at the beginning of the fiscal year, the receipts and disbursements, and the balance on September 30, 1924. On that day the balance was \$472,972.17, of which \$27,433.99 reverted to the general fund of the state, \$71,000.00 reimbursed the general rotary fund and \$374,538.18 was available as working capital for the ensuing year. The printed reports of the several institutions contain detail information concerning the operation of these funds.

THE STATE INSTITUTIONS
ROTARY FUNDS, OCT. 1, 1923, TO SEPT. 30, 1924

INSTITUTION	Appropriation or Balance in Fund Oct. 1, 1923	Receipts	Total	Dis- bursements	Balance Sept. 30, 1924	Available for Further Use	Reverted to General Fund*

Boys' School— Industries (Acts 1920, p. 78).....	1,000 00	737 76	1,737 76	32 90	1,704 86	1,000 00	704 86
Total.....	\$449,421 60	\$890,007 63	\$1,339,429 23	\$866,456 96	\$472,972 27	\$445,538 28	\$27,433 99

*Under the provisions of the several acts governing these rotary funds, there reverts to the State General Fund at the close of the fiscal year the surplus over \$800,000 in the State Prison Binder Twine Fund, \$50,000 in the Reformatory Trade School Fund, \$21,000 in the State Farm Industries Fund, and \$1,000 in the Boys' School Industries Fund.

CENTRAL HOSPITAL FOR INSANE, INDIANAPOLIS.

Superintendent, Dr. Max A. Bahr, since December 8, 1923.

Established, 1844; opened, November 21, 1848.

Location: Within the city limits of Indianapolis, on West Washington Street, three miles west of the center of town. Reached by city street cars. Postoffice, Indianapolis.

Real estate: In farm and garden, 59 acres; otherwise used, 101.4 acres; total, 160.4 acres.

Inventory: Grounds, \$177,942.19; buildings, equipment and supplies, \$2,822,417.80; total, \$3,000,359.99.

District: Counties of Benton, Boone, Carroll, Clinton, Fountain, Hamilton, Hancock, Hendricks, Howard, Jasper, Madison, Marion, Miami, Montgomery, Newton, Parke, Tippecanoe, Tipton, Vermillion, Wabash, Warren and White. Population of district (census of 1920), 862,565.

Capacity: For males, 629; females, 990; total, 1,619.

Patients: No age limit. Must have legal settlement. Received by commitment of an insanity commission or on voluntary application. The commission consists of a justice of the peace in the proper county and two reputable practicing physicians, selected by him or by the judge of the circuit or superior court. A preliminary examination may be made and temporary care provided by justice of the peace, pending the formal inquest. The finding of the commission is filed with the clerk of the circuit court, who is responsible for the patient thereafter until received by the state hospital. Clothing and transportation are furnished at county expense, if necessary. Unless otherwise furnished the first supply of clothing is purchased by the clerk of the circuit court; after admission to a hospital it is furnished by the superintendent, who transmits a bill therefor to the county through the Treasurer of State. All other expenses of the hospital are paid by the state. The hospital may collect for maintenance at the rate of four dollars per week from the estate of a patient if that estate is not needed for the support of near relatives.

MOVEMENT OF POPULATION, YEAR ENDING SEPTEMBER 30, 1924.

SCHOOL FOR FEEBLE-MINDED YOUTH, FORT WAYNE.

Superintendent: Dr. Byron E. Biggs, since May 1, 1922.*

Established, November 1, 1879, as an adjunct to the Soldiers' and Sailors' Orphans' Home at Knightstown, under the name Asylum for Feeble-Minded Children. On May 7, 1887, the children were moved into certain buildings at the Eastern Hospital for Insane, Richmond. The Legislature of 1887 made provision for the erection of a separate institution at Fort Wayne, to be called the Indiana School for Feeble-Minded Youth, and this was opened July 8, 1890.

Location: Within the city limits of Fort Wayne. Reached by city street cars. Postoffice, Fort Wayne.

Real Estate: In farm and garden, 580.33 acres; in orchard, 25.5 acres; otherwise used, 297.59 acres; total, 903.42 acres. This includes two colony farms. The first, Colonia, was begun on leased land in 1893 and afterward established permanently on a farm purchased by the state in 1895. This was the first colony farm in Indiana. The second farm, Black Hawk, was purchased in 1918. There are 509.96 acres in Colonia farm, 339 in Black Hawk farm.

Inventory: Grounds, \$199,355.23; buildings, equipment and supplies, \$954,727.78; total, \$1,154,083.01.

Capacity: For males, 627; for females, 908; total, 1,535.

Patients: Age limits, 6 to 16 years for boys and girls; 16 to 45 years for women. Must have legal settlement in Indiana. Children are received on application of parents or guardians or by circuit court commitment; women are received by circuit court commitment. Blanks are supplied by the superintendent on request. Any reputable citizen of the county concerned may, without expense to himself, file a petition with the clerk of the circuit court for the commitment of a feeble-minded person to the institution. The costs of proceedings are paid by the county. The county, if necessary, furnishes clothing and transportation. The state bears all maintenance expense, except of inmates who have sufficient estate of their own or whose parents or guardians are able to pay, in which event the board of trustees may require them to pay for or contribute to their support.

* Dr. Biggs resigned December 15, 1924. Dr. L. Potter Harshman was acting superintendent from December 15, 1924, to January 1, 1925, when James G. Jackson became superintendent.

FARM COLONY FOR FEEBLE-MINDED, BUTLERVILLE.

Superintendent: Ernest E. Chenoweth, since February 11, 1920.
Established, 1919; opened, December 13, 1920.

Location, at Butlerville, seven miles east of North Vernon. Local station, Butlerville, on the Baltimore and Ohio R. R., or reached by conveyance from North Vernon. Postoffice, Butlerville.

Real Estate: In farm and garden, 887 acres; in orchard, 13 acres; otherwise used, 917.71 acres; total, 1,817.71 acres.

Inventory: Grounds, \$107,206.00; buildings, equipment and supplies, \$277,598.37; total, \$384,804.37.

Capacity: For males, 180. No cottages for women have as yet been built.

Patients: No age limit. Must have legal settlement. Received on commitment by the circuit court, if there is room in the institution and if the superintendent decides that the case is admissible. An examination is conducted by two physicians appointed by the court. Application may be made by any reputable citizen of the county concerned, without becoming liable for any of the costs arising therefrom. Clothing and transportation are furnished by the county. Unless otherwise provided, the first supply of clothing is purchased by the clerk of the circuit court; thereafter by the institution, the bill being sent to the county through the Treasurer of State. All other expenses of the institution are paid by the state. If an inmate has an estate or if his parents are financially able to pay for his support, the state is reimbursed a definite amount fixed by the board of trustees.

VILLAGE FOR EPILEPTICS, NEWCASTLE.

Superintendent: Dr. W. C. Van Nuys, since May 7, 1906.

Established, 1905; opened, September 16, 1907.

Location: Two miles north of Newcastle. Reached by conveyance from Newcastle. Postoffice, Newcastle.

Real estate: In farm and garden, 751 acres; in orchard, 30 acres; otherwise used, 553.8 acres; total, 1,334.8 acres.

Inventory: Grounds, \$199,717.00; buildings, equipment and supplies, \$795,936.57; total, \$995,653.57.

Capacity: For males, 458. Cottages for women and girls are in process of erection.

Patients: No age limit. Must have legal settlement. Received on commitment by the circuit court. The petition for commitment must be filed by a "reputable citizen of the county". A medical examination is conducted by two physicians appointed by the court. Hopeful cases have the preference in all admissions. No hopelessly or violently insane person is received. If not otherwise provided, clothing is furnished, first by the clerk of the circuit court at county expense, and afterward by the institution. In the latter event, the state is reimbursed by the county. The traveling or incidental expenses of both patients and attendants to and from the village are paid by the county. Except for the clothing account, the institution is maintained by the state. The village may collect for maintenance at the rate of four dollars per week from the estate of a patient, if that estate is not needed for the support of near relatives.

SOLDIERS' HOME, LAFAYETTE.

Commandant: Col. Wm. M. Loudon, since October 1, 1922.

Established, 1895; opened, July 4, 1896. (A state home for soldiers and sailors had previously been established at Knightstown in 1867. It was destroyed by fire in 1871.)

Location: Three and one-half miles north of Lafayette and three miles southwest of Tippecanoe Battleground. Reached by interurban railroad.

Real Estate: 218.03 acres.

Inventory: Grounds, \$81,700.00; buildings, equipment and supplies, \$1,145,753.50; total, \$1,227,453.50.

Capacity: For men and women, 1,120.

Members: Honorably discharged soldiers, sailors, marines and nurses who have served the United States in any of its wars, and who have been residents and citizens of Indiana for two years immediately preceding and who are residents at the time of application, and who may be disabled and destitute; also the wives of such disabled and destitute soldiers, sailors and marines, and disabled and destitute widows over 45 years of age, of soldiers, sailors or marines of the United States who have been residents of Indiana for two years immediately preceding and who are residents at the time of application for admission; all under such rules and regulations as may be adopted by the board of trustees. The trustees at their discretion may admit widows of Spanish-American and World War veterans who may be under 45 years of age. Except where the widow of a soldier shall marry another soldier, the benefits of the home extend only to widows and wives of soldiers when the contract of marriage was entered into more than two years prior to applying for admission. Application blanks are furnished by the home.

The home is supported by the state at the rate of \$26 per month for each member, officer and employe thereof. The state is reimbursed by the United States to the extent of \$120 per year for each soldier, sailor or marine. Each member receiving a pension is required to contribute a portion of it, to be used "in any manner that will add to

the comfort and welfare" of the members of the home. During the year ending September 30, 1924, the government reimbursement amounted to \$16,226.67.

SOLDIERS' AND SAILORS' ORPHANS' HOME, KNIGHTSTOWN.

Superintendent: Leslie A. Cortner, since October 1, 1923.

Established, 1867; opened, June 15, 1867.

Location: Two miles south of Knightstown. Reached by conveyance from Knightstown. Postoffice, Knightstown.

Real Estate: In farm and garden, 138 acres; in orchard, 8 acres; otherwise used, 96 acres; total, 242 acres.

Inventory: Grounds, \$26,136.00; buildings, equipment and supplies, \$289,665.30; total, \$315,801.30.

Capacity: For males, 300; females, 200; total, 500.

Inmates: Age limit, under 16 years. Received on application of parents or guardians, to the superintendent. Blanks are furnished on request. "Orphans and children of honorably discharged soldiers, sailors, marines and nurses of the United States, of the civil war, the war with Spain or in the Philippine Islands, the China Relief Expedition, the war with Germany, or in the regular service, residing in this state, or in state or national military homes, having been admitted thereto from Indiana, who may be destitute of means of support and education" are eligible to admission. They may remain in the home until 18 years old unless sooner discharged for cause. The control of the child remains with the person who applies for its admission. If transportation to the home is not otherwise provided, it can be obtained from the township trustee. It will be paid by the county if the child is a public ward. All expense of maintaining the home is borne by the state

ROBERT W. LONG HOSPITAL OF INDIANA UNIVERSITY, INDIANAPOLIS.

Administrator: Robert E. Neff, since June 15, 1914.

Established 1911, by a bequest from Dr. and Mrs. Robert W. Long, whose desire was to make it possible for "worthy persons of limited means from all parts of Indiana to secure hospital advantages and the services of the best physicians." The General Assembly of 1911 accepted the bequest and pledged the faith of the state to carry out its object. The hospital is managed by a committee from the board of trustees of Indiana University. A training school for nurses is conducted. The University Department of Social Service and the School of Medicine are in operation and the Riley Memorial Hospital for Children* is in course of construction on the same grounds. The Robert W. Long Hospital was opened June 15, 1914.

*The Riley Hospital was formally opened November 19, 1924.

Location: No. 1076 West Michigan Street, Indianapolis; about one mile from the center of town. Reached by city street car. Postoffice, Indianapolis.

Real estate: 19.5 acres.

Inventory: Grounds, \$75,000.00; buildings, equipment and supplies, \$296,066.60; total, \$371,066.60.

Capacity: 116.

Patients: The hospital is open to patients requiring medical, surgical, orthopedic or obstetrical care. All persons who are wards of the state and persons who are certified by township trustees or other qualified authorities to be unable to pay are admitted and cared for free of charge. Pay patients are received, at rates fixed by the management.

INDIANA STATE SANATORIUM, ROCKVILLE.

Superintendent: Dr. Amos Carter, since June 10, 1919.

Established 1907, as the State Hospital for the Treatment of Tuberculosis; opened, April 1, 1911. Name changed in 1919 to "The Indiana State Sanatorium."

Location: Three and one-half miles east of Rockville. Railroad station, Sand Creek, on the South Bend, Logansport and Terre Haute division of the Pennsylvania Railroad. Postoffice, Rockville.

Real estate: In farm and garden, 235 acres; in orchard, 5 acres; otherwise used, 264 acres; total, 504 acres.

Inventory: Grounds, \$24,000.00; buildings, equipment and supplies, \$355,583.27; total, \$379,583.27.

Capacity: for males, 80; females, 80; total, 160.

Patients: No age limit. Only such persons, having legal settlement, as are afflicted with incipient pulmonary tuberculosis can be received at the sanatorium. The law gives preference to indigent or partially indigent citizens. Such persons are received on the certificate of the township trustee as to their ability or inability to pay and of a physician that the disease is in the incipient stage. If there is room in the sanatorium after indigent and partially indigent patients are provided for, other citizens may be received at their own expense. Whatever is not paid by the patients themselves is made up by the county, but the county has a right of action against patients who neglect to pay the amount fixed in their application. The superintendent is prohibited from accepting any patients whose disease is beyond the incipient stage. Traveling expenses of indigents to and from the sanatorium are paid by the township trustee from the poor fund. The state bears all the expense of maintaining the sanatorium. The sanatorium turns into the state treasury all receipts and earnings.

INDIANA STATE SCHOOL FOR DEAF, INDIANAPOLIS.

Superintendent: Oscar M. Pittenger, since July 1, 1919.

Established, 1844, as "The Asylum for the Education of the Deaf and Dumb" in a rented building at the southeast corner of Illinois and Maryland Streets, Indianapolis; removed October 1, 1846, to south side of Washington Street, between Pennsylvania and Delaware Streets; removed October 2, 1850, to corner of East Washington and State Streets. On October 11, 1911, the school was opened in its present location. Name changed to Indiana State School for Deaf in 1907.

Location: Forty-second Street and the Monon R. R., in Indianapolis. The Broad Ripple street car line passes within two blocks of the school. Postoffice, Indianapolis.

Real estate: In farm and garden, 37 acres; in orchard, 5 acres; otherwise used, 34.96 acres; total, 76.96 acres.

Inventory: Grounds, \$120,000.00; buildings, equipment and supplies, \$1,380,000.00; total, \$1,500,000.00.

Capacity: For males, 175; females, 175; total, 350.

Pupils: Open to deaf children, residents of the state and of suitable capacity for receiving instruction, from seven to twenty-one years of age. Attendance is compulsory for children between the ages of 7 and 18 years, provided their application is accepted by the board of trustees. The law requires parents and guardians to furnish all necessary clothing and pay traveling expenses. All other expenses are borne by the state. If the superintendent provides clothing and transportation for indigent children, he files a bill therefor with the Treasurer of State, who collects the amount from the proper county. Pupils are received on application to the superintendent, who furnishes the necessary blanks. The school year is nine months, beginning ordinarily in September and closing in June.

INDIANA STATE PRISON, MICHIGAN CITY.

Warden: Edward J. Fogarty, since January 1, 1911.

Established, 1859, as the Indiana State Prison North. Much of the work of construction was done by prisoners from the State Prison South, at Jeffersonville, the first detachment of whom arrived April 5, 1860. Made a receiving prison by an act approved June 1, 1861.

Indiana Hospital for Insane Criminals, established in 1909 and opened October 12, 1912; adjoins the State Prison enclosure and is under the same management.

Location: In Michigan City. Reached by city street car. Post-office, Michigan City.

Real estate: In farm and garden, 65 acres; otherwise used, 38 acres; total, 103 acres. "Blair Farm," containing 1,800 acres, is leased by the prison and operated by prison labor.

Inventory: Grounds, \$41,200.00; buildings, equipment and supplies, \$1,171,381.76; total, \$1,212,581.76.

Capacity: 1,597.

Prisoners: In the state prison are incarcerated all men convicted of any crime, the sentence for which is death or life imprisonment*;

also all men 30 years of age or over, convicted of felony in any court in the state, and men transferred from the Indiana Reformatory. The institution is maintained wholly by the state. The counties pay the transportation expenses of prisoners to the prison, as well as the sheriff's mileage both going and returning. The state pays a discharged prisoner's expenses back to the county from which he was committed, or to some point equally distant to which he may prefer to go.

Inmates of the state prison and reformatory, adjudged insane by a lunacy commission, can be committed to the Indiana Hospital for Insane Criminals, on the order of the Governor. The law requires that the "next friend" or a relative shall be notified of the proposed inquest, that he may be present if he so desires. It further requires that a notification shall be sent to the secretary of the Board of State Charities. The defendant in a criminal cause, if found to be insane, may be committed to this hospital by the court, and patients of state institutions for mental cases who develop homicidal or criminalistic tendencies may be transferred thereto. Inmates are held so long as their insanity continues. Insane criminals must be returned to the penal institution from which they were transferred if they recover their sanity before the expiration of the term for which they were sentenced.

* For the crimes of treason and of murder in the first degree the sentence in this state is either death or life imprisonment. For persons convicted of a felony for the third time (habitual criminals) and those found guilty of murder in the second degree or of rape upon a child under twelve years of age, the punishment is life imprisonment. The death penalty is inflicted by electrocution. All executions are at the state prison.

ROTARY FUNDS.

The state prison has two rotary funds for its industries. One was authorized by the Legislature of 1907 for the operation of a binder twine plant. With the consent of the Governor this has been extended from time to time to include other industries. The other was authorized by the Legislature of 1917, for farming purposes. For the fiscal year ending September 30, 1924, receipts and disbursements were as follows:

	Binder Twino Fund	Farm Fund
Balance in fund October 1, 1923.....	\$370,398 79	\$6,376 99
Receipts, fiscal year ending September 30, 1924.....	519,140 92	16,350 61
Total.....	\$889,539 71	\$22,727 60
Disbursements.....	527,627 78	18,087 74
Balance.....	\$361,911 93	\$4,639 86

The balance in each of these funds is available for working capital for the ensuing year.

INDIANA REFORMATORY, PENDLETON.

Superintendent: A. F. Miles, since December 11, 1923.

Established at Jeffersonville in 1821, as the Indiana State Prison. Became the State Prison South in 1859 when another prison was established in Michigan City; became the Indiana Reformatory in 1897. The first prisoners were received November 1, 1822. Under an act approved December 15, 1921, a tract of land a short distance southwest of Pendleton was purchased as a new site for the reformatory, and the new institution was formally opened November 19, 1923. The Union Traction cars stop at the door. Postoffice, Pendleton.

Real estate: In farm and garden, 567 acres; otherwise used, 461.14 acres, total 1028.14 acres.

Inventory: Grounds \$202,944.00; buildings, equipment and supplies \$2,968,546.00; total \$3,171,490.00.

Capacity: 800.

Prisoners: Men who are more than 16, and less than 30 years of age, convicted of felony in any court in the state, are committed unless the sentence is death or life imprisonment, to the custody of the board of trustees of the reformatory, to be confined by them at the reformatory, or such other place as they may determine. With the consent of the Governor, the board of trustees may transfer to the state prison any inmate who is found to have been more than 30 years of age at the time of his conviction, or to have been previously convicted of a felony; and it may also transfer any apparently incorrigible prisoner whose presence in the reformatory appears to be seriously detrimental to the well-being of the institution, or who has been adjudged insane under the law establishing the Indiana Hospital for Insane Criminals.

As with the state prison, all expenses of the institution are borne by the state.

ROTARY FUNDS.

The reformatory has two rotary funds, one for its trade schools, the other for its farm. The books of the state auditor show the following use of these two funds:

	Trade School Fund	Farm Fund
Balance in fund October 1, 1923.....	\$50,000 00	\$645 82
Receipts during year ending September 30, 1924.....	178,253 28	28,569 10
Total.....	\$228,253 28	\$29,214 92
Disbursements.....	159,994 58	22,367 27
Balance, September 30, 1924.....	\$68,258 70	\$6,847 65

Of the balance in the trade school fund \$18,258.70 reverted to the general fund; the remaining \$50,000.00 is available for further use.

Estimated value of farm and garden products of own raising used in the institution during the year, \$5,593.00; per capita, \$6.89. Estimated cost of production, \$1,617.98.

THE INDIANA STATE FARM, PUTNAMVILLE.

Superintendent: Ralph Howard, since May 1, 1921.

Established, 1913; opened, April 12, 1915.

Location: On the National road, one mile west of Putnamville. Railroad stations, Limesdale, three and one-half miles north; Greencastle, seven miles north, and Putnamville, one mile east. Reached by conveyance. Postoffice, Rural Route 7, Greencastle.

Real estate: In farm and garden, 750 acres; in orchard, 80 acres; otherwise used, 1,062 acres; total, 1,892 acres.

Inventory: Grounds, \$107,087.50; buildings, equipment and supplies, \$483,932.50; total, \$591,020.00.

Capacity: 600.

Inmates: Male misdemeanors over 16 years of age, convicted of the violation of any criminal law or ordinance, the punishment for which, until the establishment of this institution, was imprisonment in a county jail or workhouse, either to serve sentence or to lay out fine and costs, are received. If the imprisonment adjudged is thirty days or less, it is left to the discretion of the judge to commit the offender either to the state farm or to the county jail or workhouse of the proper county.

The maintenance expenses are paid by the state; transportation to the farm is paid by the counties; the expenses of returning a discharged prisoner to the place of his commitment or to such place equally distant as he may choose to go, is paid by the state, and reimbursed by the counties.

Average per day.....	\$357 29	\$0 61

ROTARY FUND.

Under a law of the special session of 1920, the state farm receives an annual appropriation of \$20,000 for the operation of its industries. Any surplus over \$20,000 at the close of the year reverts to the state general fund. For the fiscal year ending September 30, 1924, the fund makes the following showing:

Available October 1, 1923	\$20,000.00
Receipts, fiscal year ending September 30, 1924.....	146,817.12
	<hr/>
	\$166,817.12
Disbursements	138,346.69
	<hr/>
	\$28,470.43
Surplus to general fund	8,470.43
	<hr/>

Available October 1, 1924..... \$20,000.00

Estimated value of farm and garden products of own raising used in the institution during the year, \$39,206.59; per capita, \$66.86. Estimated cost of production, \$32,163.29.

INDIANA WOMAN'S PRISON, INDIANAPOLIS.

Superintendent: Miss Margaret M. Elliott, since April 3, 1914.

Established, 1869; opened, October 4, 1873, as the Indiana Reformatory Institution for Women and Girls. The girls were moved to a separate institution near Clermont in July, 1907, and the quarters thus vacated were remodeled as a department for women misdemeanants under an act passed in 1907. This is known as the Correctional Department of the Woman's Prison. It was opened February 3, 1908.

Location: In Indianapolis, on Randolph and Michigan Streets, about one and three-quarter miles from the center of town. Reached by city street cars. Postoffice, Indianapolis.

Real estate: In farm and garden, 7 acres; in orchard, 1 acre; otherwise used, 7.61 acres; total, 15.61 acres.

Inventory: Grounds; \$40,000.00; buildings, equipment and supplies, \$150,000.00; total, \$190,000.00.

Capacity: Penal, 60; correctional, 84; total, 144.

Inmates: Women over 18 years of age, felons to the prison, misdemeanants to the correctional department. "If the imprisonment adjudged (against misdemeanants) is 30 days or less, or if the fine and costs assessed, when not paid or replevied, would not require the defendant to serve more than 30 days," it is left to the discretion of the court to commit the offender either to the correctional department or to the county jail or workhouse. All the expenses of the institution are borne by the state, the respective counties paying the transportation of committed prisoners.

The law provides that the superintendent and the members of the board of trustees shall be women.

INDIANA GIRLS' SCHOOL, CLERMONT.

Superintendent: Dr. Kenosha Sessions, since August 30, 1911.

Established, 1869, as part of the Indiana Reformatory Institute for Women and Girls (see Woman's Prison); moved to present location under authority of an act of 1903. The new institution was opened July 11, 1907.

Location, about eight miles west of Indianapolis, on the Crawfordsville road. Local station, "Indiana Girls' School," on the T. H. I. & E. interurban and Peoria division of the Big Four R. R. Postoffice, Route B, box 378, Indianapolis.

Real estate: In farm and garden, 110 acres; in orchard, 40 acres; otherwise used, 37½ acres; total, 187½ acres.

Inventory: Grounds, \$27,725.00; buildings, equipment and supplies, \$482,551.24; total, \$510,276.24.

Capacity: 345.

Inmates: Age limits, 10 to 18 years. Girls are received on commitment from the several juvenile courts, to be confined at the school or such other place as may be designated by the board of trustees, where they can be most faithfully and properly cared for, until they reach the age of 20, unless sooner released by the board. The board, with the consent of the Governor, may transfer to the Woman's Prison any girl more than 18 years old who has been committed for crime and whose presence is detrimental to the school. The law prohibits the commitment of a girl who is epileptic, insane, feeble-minded, paralytic or afflicted with a contagious disease (except venereal), and should this condition (except the last named) develop within six months after commitment, or if within the same time a girl is found to be pregnant, she may be returned to her county.

The school is maintained by the state, the counties paying one-half the estimated cost of support, not including the use of the grounds and buildings. The law further provides that when a girl is committed at the instance of her parents or guardians, they shall, if able to do so, pay the cost of her transportation to the school and of her clothing and subsistence while an inmate there.

The law provides that the superintendent and the members of the board of trustees shall be women.

INDIANA BOYS' SCHOOL, PLAINFIELD.

Superintendent, Charles A. McGonagle, since August 2, 1918.

Established, 1867, and opened January 1, 1868, as "The House of Refuge for Juvenile Offenders." The present name dates back to 1903.

Location: One mile southwest of Plainfield. Local interurban station within the institution grounds. Postoffice, Plainfield.

Real estate: In farm and garden, 732.69 acres; in orchard, 40 acres; otherwise used, 205.79 acres; total, 978.48 acres.

Inventory: Grounds, \$171,233.13; buildings, equipment and supplies, \$564,059.89; total, \$735,293.02.

Capacity: 590.

Inmates: The school receives boys from 10 to 16 years of age, committed for violation of criminal laws and from 10 to 17 years for incorrigibility, no commitment being for a shorter period than until the boy attains the age of 21 years. The boys are committed by the several juvenile courts to the custody of the board of trustees of the school, to be confined there or in any place designated by the board, where they can be most faithfully and properly cared for. The law specifies that no boy shall be committed to the school "who is not of sound intellect and free from cutaneous and other contagious diseases (except venereal), or who is subject to epileptic or other fits." The board has authority to release the boys at any time on trial and may at its discretion discharge them at the age of 18. With the consent of the Governor, the board may transfer to the Indiana Reformatory any boy convicted of crime, who is more than 17 years old and whose presence in the school is detrimental.

The state maintains the institution, and is reimbursed by the counties having boys there to the extent of one-half the estimated cost of support, not including the use of the grounds and buildings.

MOVEMENT OF POPULATION, YEAR ENDING SEPTEMBER 30, 1924.

	Males	Total
Number of inmates enrolled, October 1, 1923:		
Actually present.....	440	440
On furlough or parole.....	610	610
Temporarily absent.....	8	8
Total.....	1,058	1,058
Number of inmates enrolled, September 30, 1924:

ROTARY FUND.

From a special fund provided by the special session of the legislature of 1920, the Boys' School was allowed an industrial rotary fund of \$1,000 October 1, 1922. The operation of the fund for the fiscal year was as follows:

Available October 1, 1923	\$1,000.00
Receipts, year ending September 30, 1924.....	737.76
	<hr/>
	\$1,737.76
Disbursements	32.90
	<hr/>
	\$1,704.86
Reverting to general fund.....	704.86

Estimated value of farm and garden products of own raising used in the institution during the year, \$44,220.54; per capita, \$94.13. Estimated cost of production, \$19,533.40.

THE STATE INSTITUTIONS.

Summary of Statistics, October 1, 1923, to September 30, 1924.

1. MOVEMENT OF POPULATION

	Males	Females	Total
A. Number of inmates enrolled, or belonging, October 1, 1923:			
1. Actually present.....	7,779	5,129	12,908
2. On furlough or parole.....	1,649	385	2,034
3. On suspended sentence.....	261	16	277
4. Temporarily absent.....	72	46	118
Total.....	9,761	5,576	15,337
B. Number of inmates enrolled, or belonging, September 30, 1924:			
1. Actually present.....	8,653	5,296	13,949
2. On furlough or parole.....	1,439	397	1,836
3. On suspended sentence.....	372	19	391
4. Temporarily absent.....	207	35	242
Total.....	10,671	5,747	16,418
C. Number added to enrollment since beginning of fiscal year:			
1. New admissions:			
a. By commitment.....	5,288	1,032	6,320
b. By application.....	1,182	1,611	2,793
2. By transfer, reinstatement, etc.....	330	17	347
3. For supervision (suspended sentence cases).....	362	13	375
Total.....	7,162	2,673	9,835
D. Dropped from enrollment since beginning of fiscal year:			
1. Deaths in institution.....	433	325	758
2. Discharged from institution.....	3,862	1,921	5,783
3. Discharged from parole or temporary absence.....	1,296	227	1,523
4. All others.....	661	29	690
Total.....	6,252	2,502	8,754
Highest number present during year.....			14,304
Lowest number present during year.....			12,522
Average daily attendance during the fiscal year.....	8,258.12	5,223.78	13,481.90
Same for corresponding period in 1923.....	7,878.23	5,041.49	12,919.72
Same for corresponding period in 1922.....	7,983.47	4,991.95	12,975.42
Same for corresponding period in 1921.....	7,221.88	4,949.64	12,170.92
Same for corresponding period in 1920.....	6,691.09	4,802.28	11,511.37
Average number of officers and employees.....	1,208.23	911.7	2,119.93

2. EXPENDITURES (Exclusive of Rotary Funds.)

	Per Capita	Total
Ordinary Expenses:		
Salaries and wages.....	\$123 46	\$1,664,523 51
Subsistence.....	59 54	802,751 36
Clothing.....	12 70	171,211 28
Office, domestic and outdoor departments.....	97 51	1,314,621 78
Ordinary repairs and minor improvements.....	14 98	201,876 09
Total Ordinary.....	\$308 19	\$4,154,984 02
Extraordinary Expenses:		
Land and structures.....		\$2,131,176 47
Grand Total.....		\$6,286,160 49
Receipts and earnings (including \$27,433.99 surplus reverting to general fund from certain industrial rotary funds).....		\$453,432 87
Expenditures less receipts and earnings.....		\$5,832,727 62

*Owing to the change in the date of the fiscal year, these figures are for eleven months only.

†From June 15, 1918 to January 1, 1919 the property was occupied by the War Department as an Army Training School. This accounts for the low expense compared with previous years. The School session 1918-1919 was not held; that of 1919-20 opened September 23, 1919.

*Owing to the change in the date of the fiscal year, these figures are for eleven months only.

†Includes boys on parole not heretofore counted.

THE INDETERMINATE SENTENCE AND PAROLE LAW.

The indeterminate sentence law, applying to male lawbreakers (Acts of 1897, Chap. 143), and the Indiana Reformatory Act embodying the indeterminate sentence and parole (Acts of 1897, Chap. 53) were passed at the same session of the Legislature and became operative April 1, 1897. In 1899 the provisions of Chap. 143 of the Acts of 1897 were extended to include the Woman's Prison, effective April 1, 1899. In essentials, the two laws are identical. One difference may be noted. The Reformatory Act made the board of managers (trustees) the parole board. Under the other law, the parole board was to be composed of the trustees, warden, physician and chaplain of the respective institutions. In 1907 (Acts of 1907, Chap. 98), the Prison Trustees alone were made the parole board for the state prison but the Woman's Prison parole board remains as originally constituted.

In 1905, when the penal code was revised, the indeterminate sentence law was included (Acts of 1905, pp. 644-5), but again made no mention of women offenders.

The laws as now operative apply to men over 16 years of age and women over 18, convicted of felony, except those committed for life. In recent years there has been a tendency on the part of the General Assembly to fix a definite sentence for certain crimes; e. g., "Bolshevism" (1919), for which the sentence is five years or a fine of \$5,000, or both; also, auto-banditry (1921), "any *determinate* period not less than 10 nor more than 25 years." For the most part, sentences are indeterminate within the limits of the minimum and the maximum specified in the Acts for the crime committed.

A prisoner whose minimum term has been served may apply to the board of trustees of the institution for release on parole, and the board may grant the parole "if there is reasonable probability that such applicant will live and remain at liberty without violating the law." The board is prohibited from entertaining any form of application or petition for the release of a prisoner except that of the prisoner himself. The board's decision is based upon the prisoner's record, which record, the law requires, shall include a biographical sketch covering such items as may indicate the cause of the criminal character or conduct of the prisoner and also a record of his demeanor, education and labor while confined in prison.

A paroled prisoner may be held under supervision until the expiration of the maximum term of his sentence, and may be returned to prison at any time the prison authorities believe he has violated his parole or is about to lapse into criminal ways or company. On the other hand, the parole board has authority to grant him an absolute discharge at any time it appears reasonably probable that he will be a law-abiding citizen and his discharge is not incompatible with the welfare of society.

As indicated in the following statistical table, the State Prison has paroled 6,560 men, the Reformatory 10,338 men, the Woman's Prison 542 women. It must be understood that this was not an act of clemency on the part of the institution. All prisoners so released would have gone out anyway, under a definite sentence. The great difference was

that when they left on parole, they had the assistance of the state (if necessary) in readjusting themselves,—finding employment, a place to live, etc. Under the law they remain under supervision not less than a year.

The records of 27½ years' operation of the law shows that of the 17,440 men and women paroled, 25½% failed to live up to the terms of their parole. More than half the delinquents were apprehended and returned to prison.

Altogether, the paroled men and women, during the period of their supervision, earned their living and had an average saving of \$70 each at the time they ceased reporting.

THE SUSPENDED SENTENCE LAW.

The suspended sentence law was passed in 1907 (Acts of 1907, Chap. 236). Section 1 of the original act was amended in 1909 (Chap. 174) and again in 1919 (Chap. 234). (Burns' 1914: 2175-6 and Supplement of 1921: 2174.)

The statute is based on the assumption that it is possible to reclaim many law-breakers without fixing upon them the stigma of prison life.

Authority to suspend sentence is conferred upon the several circuit and criminal courts whenever the judge in his discretion determines that the penalty of the law should not be imposed because of the circumstances under which the offense was committed, or because the interest of society does not require that the offender shall suffer the penalty if he or she shall thereafter behave well. The law applies to all misdemeanors and to all felonies except burglary, rape, murder, arson, treason and kidnapping. The judge may revoke the order without notice at any time by entering the reason on the order book, and the original sentence must then be carried out.

Misdemeanants may be released on probation to the juvenile court probation officer or upon such terms as the judge may deem proper. Of this class no statistics are available. When the sentence is to one of the two state prisons or the Indiana Reformatory, the probationed offender is thereafter in the legal custody and control of the institution to which he otherwise would have been sent, and is subject to the rules and regulations governing paroled prisoners. Of this class the institutions named keep accurate records.

The law has now been in force seventeen and one-half years. Its results, so far as the state institutions are concerned, are seen in the following table. In the time indicated, sentence was suspended in the case of 3,830 men and women, 1,111 of whom otherwise would have had to go to the state prison, 2,618 to the reformatory and 101 to the Woman's Prison. The law provides that if these persons on probation violate their parole, the original sentence shall be carried out. This was done in the case of 424 prisoners, while 596 others who were delinquent had not been apprehended up to the close of the fiscal year. These 1,020 constituted 26.6 per cent of the whole number placed on probation. The percentage of violations reported from different institutions was as follows: The State Prison, 21.8; the Reformatory, 32.5; the Woman's Prison, 25.7. Of the remaining 2,810, 25 died, 390 were under supervision, 2,388 had been discharged and 7 had been pardoned by the Governor.

COUNTY HOSPITALS.

Two kinds of county hospitals may be established under the laws of Indiana: general and tuberculosis.

COUNTY GENERAL HOSPITALS.

Any county in the state may establish a general hospital under Chapter 144, Acts of 1917, as amended by Chapter 16, Acts of 1919, Chapter 203, Acts of 1921, and Chapter 115, Acts of 1923. There must be established in connection with it a department for the detention of persons whose sanity is being officially inquired into. There may be, if desired, a training school for nurses, a department for the treatment of persons suffering from tuberculosis and a veterinary laboratory.

The law provides for a referendum vote on petition of two hundred resident freeholders of the county. The project may be voted on at a regular election, or at one called for the purpose. If the vote is favorable, the county commissioners must purchase or build a hospital, and if necessary may issue bonds to cover the cost of the building and its maintenance. The tax levy is limited to two mills on the dollar, for a period of not to exceed twenty years. Plans and specifications must be approved by the Board of State Charities.

For the management of the hospitals, the county commissioners appoint a board of four trustees, two of whom may be women. Not more than two shall be of the same political belief. Practicing physicians are not eligible. The trustees appoint the superintendent and fix the compensation of all employees.

These hospitals are established for the benefit of the inhabitants of the county in which they are located and of any person falling sick or being injured within its limits. The board of trustees may extend its privileges to non-residents. The board of trustees fixes the charge for hospital care. This is paid by the township trustee if the patient is an indigent. The average charge for indigent patients is \$17.50 per week.

Adams, Bartholomew, Blackford, Boone, Clark, Clinton, Daviess, Decatur, Hamilton, Huntington, Jasper, Knox, Montgomery, Morgan, Putnam, Randolph, Sullivan, Vermillion, Wabash and Wells Counties own and operate general hospitals. There are hospitals in Grant, Jay, Marshall and Miami counties generally known as "County Hospitals," but each is owned and managed by a private association. Huntington and Knox County Hospitals are maintaining training schools for nurses.

Some of the older hospitals have no special facilities for the temporary care of mental patients, but all that have been built since 1917 have such provision.

DIRECTORY.

The Adams County Hospital, Mercer Street, Decatur. Erected by the county commissioners. Opened in July, 1923. Capacity, 40.

The Bartholomew County Hospital, East 17th Street, Columbus. Erected by the county commissioners. Opened in February, 1917. Capacity, 40.

The Blackford County Hospital, Vancleave Street, Hartford City. Erected by the county commissioners. Opened in April, 1923. Capacity, 35.

The Boone County Memorial Hospital, 1124 North Lebanon Street, Lebanon. Erected, with the aid of the county commissioners, as a memorial to Flavius J. Withams. Opened in February, 1917. Capacity, 35.

The Clark County Hospital, Sparks Avenue, Jeffersonville. Building formerly used as a private hospital. Purchased by the county commissioners in 1920. Plans and specifications for remodeling of the building approved by the Board of State Charities June 20, 1921. Building opened in June, 1922. Capacity, 36.

The Clinton County Hospital, South Jackson Street, Frankfort. Erected by the county commissioners. Opened in June, 1923. Capacity, 50.

The Daviess County Hospital, 1302 Grand Avenue, Washington. Formerly an orphans' home. Refurnished and opened as a hospital in April, 1915. Capacity, 20.

Decatur County Hospital, Lincoln and First Streets, Greensburg. Erected by the county commissioners as a memorial to soldiers of the World War. Plans and specifications approved by the Board of State Charities January 22, 1920. Hospital opened February, 1922. Capacity, 36 patients.

The Hamilton County Hospital, 148 North Ninth Street, Noblesville. Formerly a private institution. Purchased by the county commissioners in January, 1914. Capacity, 30.

The Huntington County Hospital, Etna Avenue, Huntington. Built by the county commissioners. Opened in September, 1917. Capacity, 35. Conducts a training school for nurses. A building erected by the county commissioners for use as a nurses' home was opened January 1, 1920.

The Jasper County Hospital, South Cullen Street, Rensselaer. Erected by the county commissioners. Opened in January, 1917. Capacity, 18.

The Knox County Hospital, known also as the Good Samaritan Hospital, South Seventh and Dubois Streets, Vincennes. Erected by the county commissioners. Opened in February, 1908. An addition opened in September, 1921. Capacity, 100. Conducts a training school for nurses. Nurses' home opened in September, 1921. Plans and specifications for the addition and for the nurses' home approved by the Board of State Charities, July 19, 1920.

The Montgomery County Hospital (formerly the L. L. Culver Union Hospital), Whitlock Place, Crawfordsville. Erected by the L. L. Culver Union Hospital Association in 1902. Transferred to Montgomery County April 8, 1924. Capacity, 25.

The Morgan County Hospital, South Main Street, Martinsville. Building and grounds donated, county paying cost of remodeling. Opened April 15, 1924. Capacity, 35.

The Putnam County Hospital, Greenwood Avenue, Greencastle. Erected by the county commissioners. Plans and specifications approved

by the Board of State Charities, February 8, 1922. Opened in August, 1923. Capacity, 45.

The Randolph County Hospital, Greenville Avenue, Winchester. Formerly the Hetty Vorhis Memorial Home for Aged Women. Deeded to the county in January, 1919, for use as a county hospital. Plans and specifications for remodeling building approved by the Board of State Charities, July 2, 1919. Opened in February, 1921. Capacity, 25.

The Sullivan County Hospital, Section Street, Sullivan. Erected by the county commissioners. Opened in September, 1918. Capacity, 32.

The Vermillion County Hospital, South Main Street, Clinton. Erected by the county commissioners. Opened July 15, 1924. Capacity, 60.

The Wabash County Hospital, 670 North East Street, Wabash. Erected by the county commissioners. Plans and specifications approved by the Board of State Charities, August 19, 1919. Opened in September, 1921. Capacity, 42.

The Wells County Hospital, 1302 South Main Street, Bluffton. Erected by the county commissioners. Opened in January, 1918. Capacity, 30. Plans for an addition were approved by the Board of State Charities August 14, 1921. Its construction has been postponed because of high cost of labor and materials.

COUNTY TUBERCULOSIS HOSPITALS.

The law authorizing the establishment of county tuberculosis hospitals is Chapter 176, Acts of 1913, as amended by Chapter 170, Acts of 1917, and Chapter 19, Acts of 1920. The purpose is "the care and treatment of persons suffering from the disease known as tuberculosis."

The county commissioners may vote to establish such a hospital. The law becomes mandatory if there is a favorable referendum vote following a petition to the commissioners signed by two hundred resident freeholders of the county. The question must be submitted to the voters at a regular election. The commissioners are authorized to acquire a suitable location and building and appoint a board of managers, at least two of whom shall be practicing physicians. This board appoints a superintendent, fixes the salary of all officers and employes and maintains general control of the hospital, reporting from time to time to the county commissioners. Plans and specifications must be approved by the State Board of Health.

Any person suffering from tuberculosis who has been a resident of the county for one year is eligible for admission to the hospital, on application to the superintendent.

The commissioners of a county which has no tuberculosis hospital may enter into a contract with a county operating a hospital, by which non-resident indigent patients may be cared for.

The per capita cost of hospital care is determined by the board of managers. Indigent and partially indigent patients are a charge upon the county of which they are residents.

Two or more counties may join in the establishment and maintenance of a tuberculosis hospital.

DIRECTORY.

Five counties, Allen, Madison, Marion, St. Joseph and Vanderburgh, own and operate tuberculosis hospitals.

The Allen County Tuberculosis Hospital, Rural Route 1, Fort Wayne. Opened August 19, 1919. Erected by the county commissioners. Capacity, 180.

The Madison County Tuberculosis Hospital, Anderson. Opened June 29, 1924. Erected by the county commissioners. Capacity, 36.

The Marion County Tuberculosis Hospital ("Sunnyside"), Oaklandon. Opened September 15, 1917. Erected by the county commissioners. Capacity, 175. Patients from outside Marion County not accepted.

The St. Joseph County Tuberculosis Hospital, Rural Route 5, South Bend. Located five miles north of South Bend. Opened in 1913. Erected by the county commissioners. Capacity, 115.

The Vanderburg County Tuberculosis Hospital (Boehne Camp), formerly a private tuberculosis hospital, is located on the lower Mt. Vernon road, near Evansville. Opened in 1907. Transferred to county in 1924. Capacity, 75.

THE COUNTY POOR ASYLUMS.

Every county in the state is required by law to maintain an asylum for the poor (Burns' 1914, Section 9744) and to support therein such persons as are placed there by the township overseers of the poor. Poor persons who have legal settlement (one year's residence, without interruption, in a township or county) have legal right to permanent care. Section 9745). The overseers are authorized to send non-residents to the asylums for temporary care if it is deemed advisable.

In 1899 the legislature revised and re-enacted the laws governing the administration of these institutions. Under that law, as amended in 1913, general authority is vested in county commissioners. It provides that they shall appoint the superintendent on the first Monday of January for a term of four years. He must be a reputable citizen of good moral character, kind and humane disposition and good executive ability, who has had a good common school education and is a skilled and experienced farmer. The commissioners prescribe rules and regulations, and with the superintendent's advice and assistance, regulate the number and fix the compensation of matrons, assistants and other employees. They may remove the superintendent from office, but only for cause, and the superintendent has the right of appeal to the circuit court. The superintendent is required to appoint all employees and he may remove them for cause, which removal must be reported, in writing, to the county commissioners at their next regular meeting. No relative of any commissioner may be employed in any capacity, nor may any relative of the superintendent be employed (except his wife as matron) without the consent of the commissioners.

The law requires commissioners to visit and inspect the asylum at least once in every three months and enter on their record a report of their observations.

Other sections of the law of 1899 have reference to the duties of the superintendent, and the purchase of supplies by competitive bids, the disposition of the farm produce and appropriation by the county council. The law, as amended by the legislature of 1913, is found in sections 9781 to 9787 of Burns' Revised Statutes of 1914. The Board of State Charities will send, to any one requesting it, a copy of Bulletin No. 112, which contains the laws relating to county poor asylums.

The legislature of 1899 passed another law of great importance to all county institutions—that which creates the board of county charities and correction. This board is required to visit and inspect each of the county institutions at least quarterly, make such suggestions to improve the administration as it deems proper, and report its observations to the county commissioners. Its purpose is solely that of helpfulness to the inmates, the officers in charge and the public, whom it represents. The reports of the various boards of county charities are of great value to the Board of State Charities, whose duty it is to study the whole system of public charities and make an annual report to the governor for the use of the legislature.

STATISTICS OF COUNTY POOR ASYLUMS.

The 92 county poor asylums and the Marion County Asylum for the Insane have 3,301 inmates. This is an increase of 7 over the census of a year ago. There is little change in the county asylum population from year to year. The census is taken on August 31 annually and the figures for this year are close to the average for the past thirty years. However, there has come about gradually a change in the makeup of the population which is full of significance. Some thirty years ago there were at times as many as 400 children in these county asylums. Two-thirds of the inmates were under 60 years of age. Now, one rarely finds a child in a county asylum and two-thirds of the inmates are past 60. The exact proportions in the census of 1893, for example, were as follows: Children, 12%; between 17 and 60 years of age, 52%; over 60 years, 36%. The census of 1924 shows 1%, 34% and 65%, respectively, in these three groups.

Classified as to sex, 2,192 are males; 1,109 are females. The superintendents report that 450 men and 384 women are feeble-minded, 249 men and 212 women are insane, 64 men and 96 women are epileptic. Ninety-seven of the epileptics are either insane or feeble-minded and are so counted. This makes a total of 1,354 mental defectives, constituting 41% of the whole number of inmates.

The year began with a population of 3,294. There were 1,309 new admissions and 591 re-admissions.

These figures are obtained from reports made quarterly to the Board of State Chairities by the superintendents of these institutions. The reports give the name, age, sex, color, marital condition and other facts of personal and family history. They give also a list of all deaths and withdrawals. All these items of information are transferred to the board's card of registration of public wards.

The annual financial reports received from county auditors show expenditures by the county asylums for the calendar year 1923, as follows: Gross maintenance and repairs, \$1,186,231.62; land and new buildings, \$89,383.64; total, \$1,275,615.26. Farm receipts, over and above the produce used in the institutions, amounted to \$160,976.27.

THE COUNTY JAILS.

Every county jail in the state was inspected during the past fiscal year by a representative of the Board of State Charities and a written report on each was filed with the board of commissioners and the judge of the circuit or criminal court of the county concerned.

The establishment of county jails dates back to territorial days. They were the first public institutions. The administration is in the hands of the sheriff, under authority of the county commissioners and, in some particulars, the judge of the circuit or criminal court. The law specifies that if the person having the care and custody of the jail "suffers it to become foul or unclean," he shall be fined not more than \$100 nor less than \$10. Each county of 50,000 or more inhabitants is required to employ a matron for the women's department. The juvenile court law of 1903 prohibits the placement of a child under 14 years of age in any jail, police station or lock-up, pending trial; also the confinement of a convicted girl under 18 or boy under 16 in "the same building, yard or enclosure" with adult convicts.

A law passed in 1909 contemplates the abandonment, for jail purposes, of any jail which the Board of State Charities, on inspection, finds unfit for the confinement of prisoners. The board reports the facts to the judge of the circuit or criminal court, who is then required to order the jail put in proper condition. Prisoners are to be sent meanwhile to the jail of some neighboring county.

This law further requires the Board of State Charities to formulate and the court to adopt rules and regulations for the conduct of the jail. Copies of these rules can be obtained from the board by any one interested.

Other important features of the law of 1909 are the requirements that the sheriff shall keep a jail record of each prisoner, report certain facts to the court at the beginning of each term, and at least once in every three months make written report to the board of county commissioners. The commissioners and the board of county charities are required to inspect the jail at least once every three months.

POPULATION STATISTICS.

During the year which ended September 30, 1924, 36,681 persons were placed in the county jails of Indiana. Men and boys numbered 34,070; women and girls, 2,611. There were 30,967 white persons and 5,714 colored. The following statement classifies the admissions by age and sex:

	Male	Female	Total
Under 14 years	304	31	335
14 to 16 years	464	82	546
16 to 30 years	15,783	1,487	17,270
30 and over	17,410	1,011	18,421
Unknown age	109	109
Total	34,070	2,611	36,681

The various charges upon which these persons were placed in jail are reported as follows:

Vagrancy	3,412	
Idling and loitering.....	393	
		3,805
Intoxication	8,759	
Violation of liquor laws.....	4,220	
		12,979
Operating automobile while intoxicated.....	795	
Vehicle taking	663	
Murder	214	
All other crimes and misdemeanors.....	14,742	
Insane	994	
Witnesses, run-aways, etc.	2,489	
		36,681
Total		36,681

There were 899 persons actually present September 30, 1924,—853 men and boys, 44 women and girls. Five hundred and eighty-nine were serving sentence, 202 awaiting trial; there were 20 insane and 86 others who were held for miscellaneous reasons. Twenty jails were empty on that day, 46 had less than 5 inmates, 11 had from 5 to 10 inmates each, 15 had ten or more inmates each, ranging from 12 in Cass County and 13 each in Grant and Madison to 54 in St. Joseph, 57 in Allen, 75 in Vigo, 134 in Lake and 197 in Marion. (This number refers to county prisoners only. The Marion County Jail has a number of Federal prisoners besides the county prisoners.)

TABLE SHOWING NUMBER OF ADMISSIONS AND NUMBER PRESENT 1915-1924.

YEAR	Number of Admissions			Number present September 30		
	Males	Females	Total	Males	Females	Total
1915.....	42,779	2,971	45,750	1,080	104	1,193

¹—Newton County prisoners are kept in Jasper County Jail.

²—Pulaski County prisoners are kept in Cass County Jail.

³—White County prisoners are kept in Cass County Jail.

DEPORTATION OF NON-RESIDENTS.

The legislature of 1917 passed a law providing for the deportation of persons who become public charges in Indiana and who are found not to have acquired legal settlement in the state. The administration of the law was placed upon the Board of State Charities. The department has now been in operation seven years and has handled 499 cases. Of 144 cases referred to the department by other states, 73 were found to have legal settlement here and were accepted; 68 others were refused. Eighty persons were deported. The net gain to the state was 75. Had they been allowed to remain in Indiana institutions, where the average per capita cost is \$300 and the average stay ten years, it would have cost the state \$225,000.

The details of the work for the year are tabulated as follows:
Total number of cases:

Pending beginning of year.....	10
Received during year.....	90
	—100

Disposition:

Deported to other states.....	10
Deported to other countries.....	2
Refused care in Indiana.....	15
Referred to other agencies.....	7
Withdrawn	17
Accepted from other states	23
Recommended for care in Indiana:	
Settlement undetermined	4
Found to have legal settlement.....	15
Cases disputed by counties, adjusted.....	2
Pending at close of year.....	5
	—100

SECRETARY'S REPORT.

To the Board of State Charities:

Ladies and Gentlemen:

My participation in the work of your various committees and my relation to the general work of the board as a whole makes a report from me in a large measure a supplement to the general report of the board, which appears elsewhere in this volume.

The statistical and record work of the office under the direct supervision of the Chief Clerk, Miss Laura Greely, has been given the usual careful attention. The tables in this report show the volume of work performed. Our system of office records, reports and registration results in the acquisition and accumulation of a vast fund of valuable facts concerning the state's dependents, defectives and delinquents. We receive reports at regular intervals from state, county, and township institutions and officials. While some of the facts collected are tabulated for our printed reports, we regret lack of clerical help prevents making a wider use of them.

The usual publications were issued during the year. These include the four regular and two special numbers of the Indiana Bulletin of Charities and Correction and the annual report. The proceedings of the State Conference of Charities were edited and published in the December bulletin. A special bulletin on Habit Training for Children, by Dr. D. A. Thom, Massachusetts Department of Mental Diseases, published by the National Committee on Mental Hygiene, was printed and distributed to child welfare agencies of the state. The proceedings of the Indiana Mental Health Conference were edited and published in the March bulletin. In addition we have sent out many monthly letters to local boards and officials, including boards of children's guardians, county boards of charities, township trustees and superintendents of poor asylums. Some reports bearing upon child welfare issued by the Federal Children's Bureau were obtained and distributed. Articles on social welfare have been prepared for "The Indiana Teacher" at the request of the Editor, Prof. Donald DuShane, who has taken an active interest in the state's social service. Acting for the Committee on Mental Defectives, we assisted in the distribution of 20,000 reports of the work of that committee.

There have been many requests for the various reports published and issued by our board. They have come from the citizens of this state and from many agencies over the country.

During the Year I have delivered addresses on phases of public charities to classes in Indiana University, the Indiana University School of Medicine, and the Indianapolis City Library.

Plans for new buildings of state and county institutions have been submitted to the board as required by law. We examined the plans

for the recreation building and filtration plant at the State Farm, the Tipton County Poor Asylum, and recreation and school building at the State Sanatorium. The secretary was called in conference with local officials to consider future developments in buildings at the poor asylums of Wayne, Wells and Elkhart counties. Our advice was sought in the remodeling of the three institutions for children in Vanderburgh County. We were requested to go over plans for a superintendent's residence and employes' cottage for the St. Joseph County Tuberculosis Hospital. Plans for a new kitchen and dining room at I. O. O. F. Home at Greensburg were submitted for suggestions and criticism.

Articles for incorporation for the Daisy Barr Home and Hospital, Indianapolis; Colored Day Nursery, Terre Haute, and revised articles of the Collett Home for Orphans, Cayuga, were approved.

On February 14, 1924, Governor McCray appointed a committee consisting of the superintendent of each of the five state hospitals for the insane, Dr. S. E. Smith and myself to consider the capacity of the hospitals in relation to the population and needs of the several districts, and to suggest a possible readjustment of the hospital districts. By request of the committee, I served as secretary, and with Dr. Smith, the chairman, made a survey of all the hospitals. The information collected was analyzed and tabulated in our office and from it the committee made its recommendations to Governor Branch, who acted upon them and redistricted the state, as reported elsewhere in this volume.

Reports of deaths, accidents and unusual occurrences have been made by state institutions. Investigations have been made where deemed necessary. There have been few serious complaints of institutions. All have been promptly investigated and wherever irregularities were found, the superintendent's attention was called to them.

The punishment records of the State Prison were examined as required by law. With an unusually large population and crowded conditions, we found the number of punishments very small.

Supervision has been given to the work of the state agency, licensing, poor relief and deportation departments. Reports of each are presented elsewhere in this volume.

As heretofore, all the county institutions have been inspected by a representative of the board. Conditions and recommendations have been reported to the local board or officials responsible for their management.

The bond of the Bureau of Catholic Charities and Social Service, of Cincinnati, which organization has begun placing children in Indiana, was approved. Three other foreign organizations which have been authorized to place dependent children in Indiana, the Cincinnati Children's Home, the Chicago Industrial Home for Children and the New York Foundling Hospital, filed continuous bonds. The bond of the New York Catholic Home Bureau is in force, but the organization has ceased placing children in this state because of the great distance, requiring much expense in placing and after-care.

At your direction, I attended the National Conference of Social Work held at Toronto, Canada, and the American Prison Association at Salt Lake City. Both meetings afforded opportunity for private conferences with leaders in social work in other states.

As secretary of the Indiana State Conference of Charities, most of the detail work of planning and preparing for the meeting which was held at Newcastle devolved upon our office. This meeting was well attended. There was an outside registration of 491. This number has been exceeded but once, at Richmond in 1915 when it was 511. The conference changed its name to the Indiana State Conference on Social Work. The next meeting will be held in Vincennes, October 3 to 6, 1925. Dr. James W. Milligan is president. During the year a number of district conferences for members of boards of children's guardians were held for the purpose of promoting activities in child welfare. Your secretary or members of the staff attended each of these meetings.

The State Federation of Clubs through some of its committees has taken an active interest in public charities. Committees on mental hygiene, child welfare and charities have sought our office for the purpose of securing information and publications and to extend their co-operation. Miss Vida Newsom, chairman of the Committee on Mental Hygiene, prepared and issued an interesting pamphlet which was widely distributed and which attracted much attention and favorable comment.

During the year the state lost through death the services of superintendents of two state institutions—Dr. Geo. F. Edenharter and George A. H. Shideler. Both were men of wide experience and rendered faithful and efficient service. The accidental death of Dr. Wilmer Christian, member of the board of trustees of the Village for Epileptics, was a keen loss to that institution and the state. He gave unselfishly of his time to the service. Dr. Sarah A. Stockton, assistant physician at the Central Hospital for Insane and formerly a member of the Board of State Charities, died at the institution. Her life was devoted to the care of the unfortunate. In December, 1924, Dr. S. E. Smith, superintendent of the Eastern Hospital for Insane, resigned to become Provost of Indiana University. He went to the hospital 33 years ago, soon after it was opened and its development is due largely to his untiring efforts. In the progress made in public social service in Indiana, Dr. Smith has always been a wise counsellor, and in the development of our state institutions he has always rendered an effective service.

In conclusion I wish to make acknowledgment of the fine spirit and service of the heads of the departments, agents, and clerical force. To them much credit is due. To the members of the board I wish to express my appreciation of their confidence and support in all my work.

Respectfully submitted,

JOHN A. BROWN, Secretary.

THE LICENSE DEPARTMENT.

Mr. J. A. Brown, Secretary.

Dear Sir:

An act of the legislature approved March 8, 1909 (Acts 1909, Chapter 154), provides that it shall be unlawful for any person or association to conduct a maternity hospital, a boarding house for infants or a boarding home for children or to engage in or assist in conducting a business of placing infants without having a written license therefor from the Board of State Charities.

The purpose of the law is to aid in preventing the operation of such agencies by unqualified persons, to discourage the organization of unneeded agencies, to raise the standard of operating agencies and institutions and to protect infants and children.

Maternity Hospitals. The term "maternity hospital" shall be held to mean a house or other place in which any person cares for within a period of six months, more than one woman, other than a relative, during pregnancy or after delivery.

Boarding Houses for Infants. The term "boarding house for infants" shall be held to mean a place conducted by any one making it a business to board infants under three years of age, or who has in his control two or more infants under three years of age, other than relatives, unattended by parent or guardian.

Boarding Homes for Children. A "boarding home for children" shall be held to mean any children's home or orphanage conducted by an individual or association for the purpose of caring for or finding homes for dependent or neglected children.

Placing Agencies. Whoever advertises or makes a business of finding homes for infants under three years of age, placing or causing the adoption of more than two infants, shall be deemed as engaged in conducting a "placing agency".

During the fiscal year ending September 30, 1924, 195 applications for license, representing 184 applicants, were received. Seven were new applications. One hundred and eighty-nine licenses were granted; one application was withdrawn; one application was rejected; four were pending at the close of the year. On September 30, 1924, licenses were in effect as follows; maternity hospitals, 97; boarding houses for infants, 27; boarding homes for children, 61; placing agencies, 7.

Six institutions went out of business during the year.

Standardized hospitals with modern, properly equipped maternity departments are replacing the old type hospitals or maternity homes.

Sixteen of the licensed boarding houses for infants are day nurseries, receiving children for day care only. The small private boarding houses for infants are licensed only on recommendation of a recognized social agency.

The boards of managers of a majority of the boarding homes for children are interested in raising the standard of their institutions. The importance of securing proper employes is being recognized. More attention is given to regular medical inspection and correction of remediable defects; to the teaching of personal hygiene and to suitable recreation

training of a kind that will enable children later to become self-supporting. The majority of private institutions receiving orphans or dependent children are now making an effort to secure suitable foster homes for such children as are placeable, realizing that institutional care can never take the place of family life for a child.

Private child-placing agencies are each year doing less direct placing.

These agencies are realizing the importance of thorough investigations, proper record keeping and close supervision after placement are referring a number of cases to agents of the juvenile courts.

Table No. 1, following this report, gives the classification, number and disposition of all applications received during the year. A summary of the visits made in connection with the work is also given.

Table No. 2 gives the list of institutions licensed during the year.

Respectfully submitted,

RAEHEL L. HILL, Inspector.

THE STATE AGENCY FOR DEPENDENT AND NEGLECTED CHILDREN.

Mr. J. A. Brown, Secretary.

Dear Sir:

The report of the State Agency for Dependent and Neglected Children, including a summary of reports made to the department by local agencies dealing with such children, covering the fiscal year ending September 30, 1924, is submitted herewith.

The State Agency (often called the Children's Department of the Board of State Charities) was created by the Legislature of 1897 (Burns' R. S. 1914, Sec. 3653-3655), to inspect "orphan" asylums, find foster homes for the children and maintain general supervision over all placed-out children.

A later law (Burns' R. S. 1914, Sec. 1642-1647), defines "dependent" and "neglected" children and provides for their being supported at public expense as wards of the juvenile court, the board of county commissioners or the board of children's guardians of the county concerned, subject to placement by agents of the Board of State Charities under conditions specified.

It is well to note the legal distinction between these two groups of children and the group known as delinquents. The latter when on probation come under the supervision of the State Probation Officer.

The State Agency not only supervises all placed-out dependent and neglected children, but devotes part of its time to actual home-finding. All local agencies and institutions caring for children which have been made public wards by the court having juvenile jurisdiction are required by law to report their work monthly to the Board of State Charities, in order that the State Agency may keep in close touch with their wards.

The Agency is organized at present with a state agent, six field workers, a clerk and two stenographers.

From the accompanying statistical tables it will be found that during the fiscal year the department investigated 309 applications for children, placed 227 children and made 3,629 visits to children, of whom there were 2,715 in foster homes on September 30, 1924. Other work includes visits to institutions and interviews with public officials.

The department never places a child without previously sending a visitor to make a personal investigation. That is the first and one of the most important steps in child-placing. Our effort has been to prepare the foster parents by setting forth clearly the responsibilities involved and by presenting all possible problems, in general and in particular. It is our experience that only in this way do we enlist their sympathy and their intelligent co-operation. We make an effort to see each member of the household and to make note of all the elements—moral, financial, religious, educational—which go to make up a good home. We consider the housing, the physical and mental health of the applicants and the neighborhood conditions. We make confidential inquiries of persons who are in position to give information we cannot

get in the home. At times we call on outsiders first, then visit the applicants, and lastly make further outside investigation. It is work which requires tact and insight. We endeavor to make each approach carefully.

CONTRACTS.

We invariably have the applicant sign a contract before taking a child. We have a printed form, which may be modified to suit specific cases. A contract aids in keeping track of placements; it is a legal and business-like procedure, and has been found of great value in settling disputes.

THE SELECTION OF CHILDREN.

Selecting children for foster homes requires study and understanding. If possible the visitor chooses the child for the home she has approved. She also makes trips to the institutions, forms friendships with the children and gets all the family and personal history possible. Prospective foster parents often wish to see the children, but experience in this office has proven that the visitor generally makes more satisfactory selections.

PREPARATION FOR PLACEMENT.

The stage is set, the actors chosen, and the visitor now introduces the principals. This contact is made easier when she has given each some information before the meeting takes place. Appearances count for much in the play, but they are of far greater importance in actual life. If there are any peculiar characteristics in manner or person, they have been explained. Many of the institutions appreciate the advisability of dressing children attractively and if the latter have learned how to meet people in a friendly way, the visitor has little trouble in making a satisfactory introduction.

THE VISITATION OF CHILDREN.

No definite rules can be formulated as to the number or frequency of visits to children. Each case is a law unto itself. The department deems it advisable to call shortly after placement. In this way the visitor may be able to make adjustments which would have been impossible after a longer lapse of time. As indicated in the statistical tables, the department made 3,629 visits during the fiscal year and in 96 7/10% of the visits found the child doing well or fairly well.

Each worker naturally has more or less individuality in her methods of approach, but there are certain inquiries that are made and which deserve special attention. Foster parents are given a chance for private interviews and if the children are old enough they, too, have opportunities to talk privately with the visitor. If at all possible, the interested parties are then gotten together.

Persons responsible for children should tell of the opportunities they are offering, of the difficulties they are having and their methods of handling them, together with the results of the reactions. Details

are important and it requires tactful questioning to get the really salient facts. The value of cooperation is impressed.

Children are generally suspicious and the visitor sometimes has difficulty in establishing friendly relations, but her tact and patience generally bring about the proper results. The children tell of the daily events, of their hopes and fears, and of their relations to the foster homes. A worker is cautioned never to make a hurried visit.

ADVANTAGES FOR CHILDREN.

The department insists upon children having the advantages of church and school and such social life as is consistent with the particular situations. The problem of recreation is not always an easy one to solve. Few of the children are in contact with each other and no concerted effort can be made. Recently some of the older girls in Indianapolis organized a club under the leadership of one of the visitors. If it proves a success, it is likely more will be started. In many cases we find the foster parents are very glad to arrange for proper entertainment.

We find a comparatively large number of instances of people providing high school and even college education for children, often times the effort means sacrifice. At present a few girls are taking business courses and nurses' training. The state is now placing most of the large girls on wages, as well as a considerable number of the boys, and their savings show a comparatively large sum. They are encouraged to save their money to aid in their advancement at a later date.

PERIOD OF SUPERVISION.

Under the Indiana law children are wards until their twenty-first birthday unless they are released by the court or legally adopted. As wards, the counties are responsible for them and should be concerned about their supervision. This department is visiting the boys until their eighteenth birthday. Experience has proven that as a rule they can then take care of themselves, and our shortage in field service makes it difficult to follow them longer. In most cases girls who have been placed by the state are supervised until they become twenty-one and results prove the value of such a plan.

RESULTS IN GENERAL.

Unfortunately no definite study has been made in Indiana as to "How Foster Children Turn Out," but our records show many happy successes. First, the children are given a new environment, and naturally their health, mental and physical, receives more attention. School and church advantages are gained, morals are emphasized and perhaps above all many of the youngsters are receiving the love and true interest of conscientious foster parents.

I again call your attention to the statistical tables which show the work done with dependent and neglected children up to the end of the fiscal year, September 30, 1924.

STATISTICS OF DEPENDENT AND NEGLECTED CHILDREN.

Table No. 1. There are thirty-eight institutions caring for dependent and neglected children which have been made public wards by the several juvenile courts. Occasionally a public ward is cared for in a private residence. On September 30, 1924, there were 1,841 children on public support in these homes. On the same day there were 2,715 children in free homes, making a total of 4,556 under supervision.

Every institution and every child in a family home was visited one or more times during the year by agents of the Board of State Charities. Altogether, 3,629 visits were made to children and in only 3 3/10% of the visits was the child not found doing well, or fairly well. The agents spent 1,444 1/4 days in the field during the fiscal year. In addition to the visits to children in foster homes, they investigated 309 applications for children, placed 227 children in homes, made 85 visits to child-caring institutions and 359 to county officials, and made 1,280 special visits and investigations.

The cost of the field work was \$17,112.65 to the state and \$971.82 to the counties. The state expense consisted of the salaries and traveling expenses of the agents; the counties paid the traveling expense of the children handled.

Table No. 2. The State Agency for Dependent Children was established in 1897 and from April 1 of that year to September 30, 1924, a period of twenty-seven and one-half years, it placed 4,815 children in foster homes. Of this number 2,788 were placed once, 2,027 were placed two or more times. Altogether 8,535 placements and replacements were made. Of the whole number placed, 548 are now in homes under supervision, 305 have been adopted, 958 remained where they were placed until they were over age for supervision. Another group of 1,742 have been released from supervision for various reasons. Some have married, some died. Others have become self-supporting. Some have been committed to other institutions. The remaining 1,262 were unsuccessfully placed and were returned to their respective counties. It may be said that out of every 100 children placed by the state agents, 74 did not again appear on the records as dependent children.

Table No. 3. This table lists the thirty-eight "orphans' homes" in the state which receive public wards. There were 1,841 such children on support September 30, 1924. From the fact that only a small proportion of them were really orphans, the name "orphans' home" is something of a misnomer. The situation is more one of neglect than of actual dependence. Of these 1,841 children, 95 were reported as full orphans, 573 as having but one parent living. This leaves 1,173 (nearly 64%) who, in the absence of any information to the contrary, are understood to have both parents living. Allowance must be made for inaccurate reports from the counties, but the small number of real orphans in these institutions has long been a matter of comment, and it is believed the figures for this year are approximately correct. For the most part it is the unfit home, the incompetent parents, not those who are merely poor, who are keeping the children's homes full.

Classified according to sex, age and color, there were among these 1,841 children, 1,085 boys, 756 girls, 1,721 white, 120 colored; 171 under 6 years of age, 776 from 6 to 12 years, 894 twelve years and over.

The number of such children on support September 30, 1924, was 151 more than on the same day in 1923.

Table No. 4. This table gives the movement of population by counties for the year ending September 30, 1924 as follows:

On public support October 1, 1923.....	1,690
New wards	1,175
Former wards returned	273

Total	3,138
-------------	-------

Disposition:

Placed in free homes	700
----------------------------	-----

Returned to parents	357
---------------------------	-----

Died	18
------------	----

All others (this includes children who became of age, transfers to state institutions, runaways, etc.)	222	1,297
---	-----	-------

On public support September 30, 1924.....	1,841
---	-------

Six counties (Clinton, Crawford, Martin, Newton, Ohio and Pulaski) report no children in orphans' homes at the close of the fiscal year. Forty-five other counties had less than 10; twenty-three counties had between 10 and 20; eighteen counties had more than 20. The highest were: Marion, 366; Vigo, 236; Vanderburgh and Madison, each 82; Lake, 67; Delaware, 58; St. Joseph, 56; and Grant, 53.

During the year, 1,175 children were made public wards—178 more than in 1923, 404 more than in 1922 and 216 more than the annual average for the past ten years, which was 959. The range was from 744 in 1920 to 1,175 in 1924.

Beside the children in orphans' homes, all the counties except Martin and Ohio report dependent children in free homes with foster parents. Some counties have two or three times as many wards in foster homes as in institutions. There were also in the neighborhood of 900 children being boarded with their own mothers under the supervision of the board of children's guardians. The number in free homes on September 30, 1924, was 2,715. This includes 178 wards of organizations of the other states who have been authorized to place their wards in Indiana.

In this connection it will be found interesting to study the following table showing the number of children in institutions and in foster homes on September 30, for the past ten years and the number of children made public wards each year.

DEPENDENT AND NEGLECTED CHILDREN (Public Wards) 1915-1924

YEAR	On public support Sept. 30, each year.	Under supervision in family homes	Number made public wards during the year.
1915.....	1,751	3,136	1,027
1916.....	1,759	3,186	1,048
1917.....	1,890	3,140	1,153
1918.....	1,844	3,181	1,002
1919.....	1,686	2,962	923
1920.....	1,560	2,902	744
1921.....	1,553	2,897	751
1922.....	1,657	2,830	771
1923.....	1,690	2,789	997
1924.....	1,841	2,713	1,175

Table No. 5. The law of 1897 relating to dependent and neglected children required county commissioners to remove children between the ages of 3 and 17 years from county poor asylums and prohibited their care in such institutions for longer than ten days. This limit was later extended to 60 days. Fifteen poor asylums reported children present August 31, 1924. There were 27 such children. Three were infants; of the remaining 24, 14 were mental cases, 2 were sick or crippled; 8 were reported as being able-bodied and bright.

Respectfully submitted,

L. H. MILLIKAN, State Agent.

TABLE²No. 1.

FIELD WORK OF THE STATE AGENTS FOR THE YEAR ENDING SEPTEMBER 30, 1924.

Visits to Children in foster homes:	
1. Doing well.....	2,983
2. Doing fairly well.....	524
3. Doing poorly.....	122
Total.....	3,629
Number of children returned to counties.....	32
Children placed in foster homes:	
1. New children received.....	131
2. Children transferred.....	96
Total.....	227
Applications investigated.....	309
Applications rejected.....	51
Visits to Orphans' homes.....	85
Visits to county officials.....	359
Special visits and investigations.....	1,280
Days spent in the field.....	1,444½
Cost of field work:	
1. Cost to State, including salaries.....	\$17,112 65
2. Cost to Counties.....	971 82
Total.....	*\$18,084 47

*For entire cost of the State Agency, see Financial Statement at the close of this report.

DEPARTMENT OF OUTDOOR RELIEF.

Mr. J. A. Brown, Secretary.

Dear Sir:

Indiana's responsibility to its dependents received legislative recognition in the Acts of 1901 as amended in the Acts of 1907, Chap. 193. Provision was made for outdoor poor relief to be administered by the township trustee as ex-officio overseer of the poor. The purpose of the law is to prevent suffering caused by poverty. It calls for discrimination in dealing with needy families by urging full knowledge of the families of applicants and the use of all possible resources, to the end that relief be administered so as not to encourage pauperism, but to eliminate it and its causes.

During the past year the writer has followed relief conditions in the state through contacts with individual overseers, county boards of education, township overseers in their state meetings, and members of the boards of children's guardians in regional meetings and individually. Applicant families were visited with overseers and with members of the boards of children's guardians. Circular letters were issued at first monthly, later at bi-monthly periods, to the overseers. Monthly letters have been sent to the boards of children's guardians.

With the overseers we have urged more study and individual treatment in the care of families and less "dole"; more careful handling of the transient problem and less of the evasive practice of dumping undesirables on to some other community. We have encouraged full co-operation with other social agencies, especially the character-building and health-building types which operate toward preventing poverty. We have urged a thorough knowledge of law and of state resources.

A full report of the relief of each township can be found in the Indiana Bulletin of Charities and Correction for June, 1924. A summary of the statistics covering the past five calendar years is attached.

Respectfully submitted,

SENA M. BORGER, Supervisor.

Total disbursements		\$47,257.49

Note: In addition to the above, the Legislature appropriated a revolving fund of \$1,000 for the traveling expenses of dependent children. It also ordered the board's annual report and quarterly bulletins printed by the Bureau of Public Printing.

TRANSPORTATION FUND.

The law establishing the State Agency for Dependent Children provides that the traveling expenses of any child conveyed by a state agent in the discharge of his duty, also the cost of the child's board when left in an institution for temporary care, shall be paid by the county of which the child is a ward. (Acts 1913, p. 711.)

During the year ending September 30, 1924, bills amounting to \$1,540.65 were rendered counties, according to the above provision of law. There were unpaid bills for the previous year amounting to \$138.87; total, \$1,679.52. Paid by counties during the fiscal year, \$1,543.05. Balance due October 1, 1924, \$136.47.

From a rotary fund of \$1,000 which the Legislature appropriates to the Board of State Charities for the purpose (Acts 1923, p. 351), the board advances the expense to the state agents and is later reimbursed by the counties concerned. From this fund the board drew \$1,000 October 5, 1923. The entire amount was returned to the State Treasurer September 30, 1924,—Quietus No. 26,646. The amount remaining unpaid by the counties on that date, \$136.47, was temporarily advanced by the secretary of the Board of State Charities.
